

Transmitter Fire Alarm – Voltage Input

Wires to your building or home alarm system, alerts you to danger.

Get a timely warning when a fire alarm activates with the Medallion™ Series Fire Alarm Transmitter – Voltage Input. Designed to be wired to a building or home fire alarm system, it broadcasts a signal to any Medallion™ Series Receiver when the fire alarm is activated. Operating on current supplied through the fire panel, it requires no batteries. Installation by a licensed electrician or fire alarm company is recommended.
