INSTRUCTION/INSTALLATION SHEET
PCB Mounting Bracket for Security and Automation
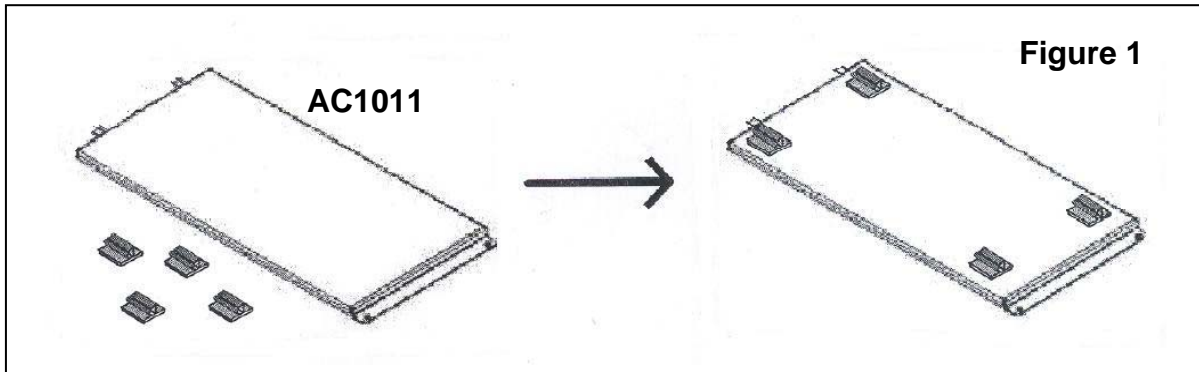

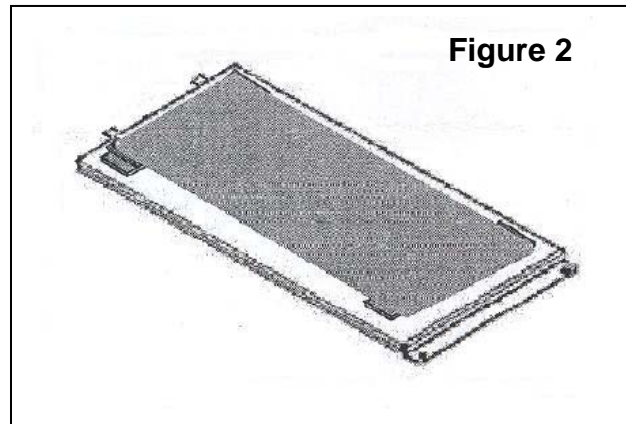

IS-0395 REV. O

1. Introduction

The On-Q/Legrand PCB Mounting Bracket for Security and Automation (P/N **AC1011**) is designed to easily mount a variety of security or automation printed circuit boards in an On-Q/Legrand enclosure.

Figure 1

AC1011

2. Description

The On-Q PCB Mounting Bracket comes with four mounting tabs used to hold the printed circuit board firmly to the bracket (see *Figure 1*).

Figure 2

3. Installation

Peel off the backing of the four mounting tabs and place them on the bracket so that all four sides of the printed circuit board will be held securely in place by the mounting tabs (see *Figure 1*). When properly installed, the printed circuit board locks into the mounting tabs (see *Figure 2*).

a. To install the bracket in an enclosure, align and insert the stationary tabs on the left hand side of the plate into the square slots in the enclosure and use the two push-pins on the right side of the plate to secure the plate to the enclosure (see *Figure 3*).
