High-Quality and Powerful

The IA-POE-90-U00 & IA-POE-90-U00-EU is a next-generation injector which is compliant with IEEE 802.3af/at/bt. With PoE (Power over Ethernet) technology, both data and power to Ethernet-enabled devices run on a standard CAT5 cable. Based on the IEEE 802.3af/at/bt PoE standard, it provides the capability to serve up to 90W on a single port using four pairs of Cat. 5e/ Cat.6 Ethernet cabling.

The IA-POE-90-U00 & IA-POE-90-U00-EU injector flexibly deploys standard and high powered PD devices to transfer data and power simultaneously through one Ethernet cable while reaching distances of up to 100 meters. It supports dual power inputs via a pluggable terminal block or DC jack. DIN-rail and wall-mounting options provide greater ease of installation.
