

Knives and Punch Tools

Twist-Lock Utility Knife

More than “just” a utility knife!

This heavy duty utility knife features thicker, larger and more durable snap off blades. The secure locking mechanism consists of a knurled twist knob that firmly locks the blade within the all steel blade channel. The knife body is constructed of impact resistant ABS plastic, yellow in color for quick identification. Blades are 7 mm thick (40% thicker than most standard blades), 25 mm wide and specially heat treated to start sharper and last longer.

Warning: Products on these pages are extremely sharp and can cause serious injury. Use proper safety techniques and equipment when using these products.

Twist-Lock Utility Knife	LS-53-105	KDSH12
Replacement Blades	LS-53-110	KDSH12RB

Automatic Center Punch

This one-handed tool will center punch a starter dimple in wood, metal, plastic or other materials to save time with starting fasteners or drilling holes. The main body of the Automatic Center Punch is constructed of blue anodized aircraft grade aluminum and the punch tip is made of hardened steel. Includes a pocket clip so that it is always with you.

Be accurate the first time! This tool can save you time and frustration with starting fasteners or drilling holes. If necessary, the steel tip can be re-sharpened using a table mounted grinder or drill mounting grinding wheel.
