## *The Auto Noodle with Retrieval Loop*

This time saving and frustration-free tool set is a must-have for new, repair or modifying existing projects such as automotive, RV's, boats, trailers, etc. Our 24" pliable coated noodle has a super strong 1/4" neodymium magnet on one end and is threaded (8/32) on the other. Included in the set is a 1"x 2" flexible wire loop, perfect for attaching, guiding and pulling wires through tight and hard to access areas. A handy 18" telescoping pocket retriever is also included.

Perfect for coach builders, all types of recreational vehicles, trailers, manufacturing, do it yourself projects, auto body, auto repair, motorcycles, all terrain vehicles, boats, agricultural equipment, airplanes and more!

Possible uses for the Auto Noodle

Tying wire to the flexible wire loop allows you to guide or pull the wire through tight and difficult paths, such as dashboards, framing, under seats, trunk spaces for stereo installation, trailer hookups and more.

The Auto Noodle can be molded to stand on it's own or wrapped around anything. Especially handy with the Lighted Bullnose Tip, giving you a directed light right where you are working.

Included in the set is the 18" telescoping pocket retriever. The hook is able to reach into places your hands cannot. The Auto Noodle is shown in background with the optional Lighted Bullnose Tip.
