

Select Series Intelligent Detectors

The System Sensor Select Series intelligent photoelectric and thermal detectors with integral communication provide point location for alarm communication and selective maintenance.

Features

- Designed to meet UL 268 7th Edition
- New modern profile
- Analog communications
- Low standby current
- Rotary address switches
- Dual LEDs for 360° visibility
- Expanded color options

Select Series smoke detectors are intelligent (addressable) detectors with point ID capability that enable each detector address to be set with rotary address switches providing exact device locations. Detector sensitivity is continually monitored and reported to the fire alarm control panel. The modern design and expanded color options support contemporary aesthetic demands. In addition, each detector is constructed for exceptional installation and maintenance efficiency.

The System Sensor **2351B (2351B-IV)** photoelectric detector's re-designed optical sensing chamber is engineered to sense smoke produced by a wide range of combustion sources in accordance with more stringent code standards. The sensitivity of Select Series detectors can be programmed using the control panel software to suit the environment. The **2351BR (2351BR-IV)** photoelectric duct smoke detector is also remote test capable for use with a DNR (DNRW) duct smoke detector. The **2351TB (2351TB-IV)** multi-sensor detector offers either photoelectric detection or thermal detection through dual electronic thermistors at 135°F (57°C) fixed temperature thermal sensing.

Select Series thermal detectors provide cost-effective, intelligent property protection with a UL 521 listing: the **5351B (5351B-IV)** offers 135°F (57°C) fixed thermal detection; the **5351RB (5351RB-IV)** offers 135°F (57°C) fixed and rate-of-rise thermal detection; the **5351H (5351H-IV)** provides fixed high-temperature detection at 190°F.
