Connecting High Power PoE Cameras over Fiber cables

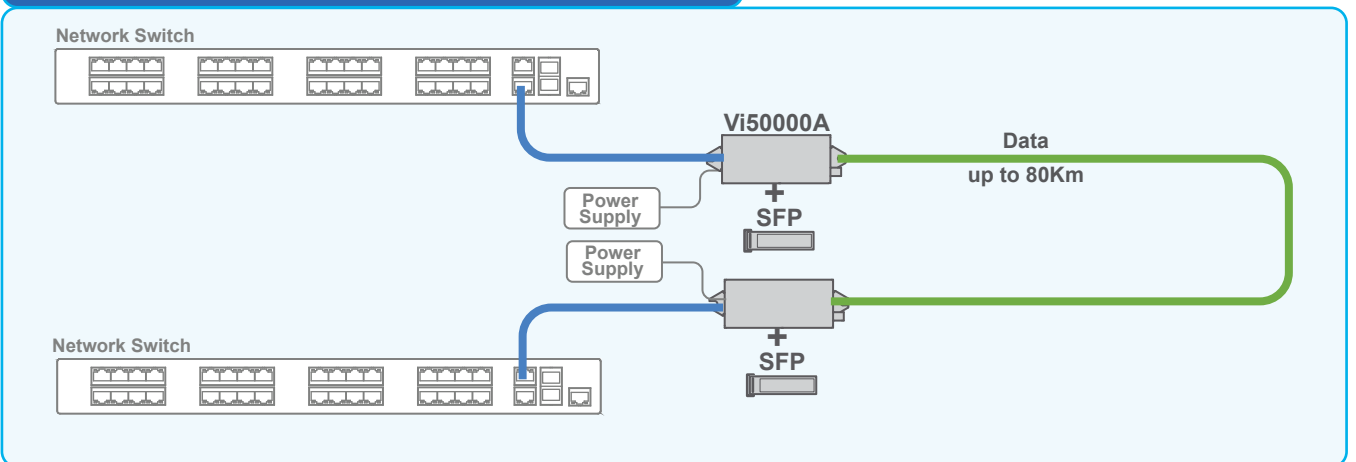

The Vi50000A is used with the Vi50001 for long distance high bandwidth applications. The Vi50000A provides up to 60W PoE power to meet the highest PTZ dome power requirements.

Connecting IP Cameras over Fiber cables

By using the SFPs, the Vi50000A will be compatible with most installed fiber types and can be directly connected to SFP modules installed in network switches.

Connecting Network Switches at long Distances

With 1000Mbps (1G) bandwidth, the Vi50000A is the perfect solution for connecting network switches over long distances.
