

ES500

Battery Powered Exit Alarm

The ES500 is designed for applications that require an alarmed exit device on secured doors. The alarm, with approximately 100dB, will sound when someone attempts an unauthorized exit. The ES500, with its redesigned shape and smaller size make it the choice for quick and easy installations on emergency exit and restricted doors. Our ES500xMC65 includes a factory installed mortise cylinder. Units without mortise cylinder are also available, as a special order item.

Weatherized
Available

ES500 Series

FEATURES & BENEFITS

- Low cost, self-contained door alarm with piezo horn
- Secure, tamper resistant housing
- Quick, easy installation saves time and money
- Alarm can only be silenced by proper control key
