# MAX® and Keystone Faceplates

The MAX series modular faceplates combine high capacity with aesthetic enhancements that provide a fresh new look to match today's technologies. The faceplate offers pressure-release designation label covers which eliminate the need for a probe-pic or screwdriver when installing faceplate labels. The faceplates are designed to be used with the angled or flat MAX modules, hybrid Z-MAX® outlets or TERA® outlets. Its durable finish masks minor scuffs that may occur during daily usage. The single gang faceplate can support up to six outlets and the double gang can support up to twelve outlets. Single-gang keystone faceplates are available in select colors and stainless steel. These faceplates are compatible with keystone MAX and Z-MAX outlets.

Quick Identification
Color-coded icons allow users to instantly identify different types of devices or applications

Variety
Faceplates available in black, white, gray, ivory, light ivory, and stainless steel

Labels
Sheets of designation labels can be ordered for use with standard printers

Installation Flexibility
MAX, Z-MAX or TERA outlets can be installed from front or rear of faceplate.

Superior Density
Fits up to 6 outlets in a single gang or 12 in a double gang faceplate.

Labeling
Faceplates include pressure-release designation label covers for quick, tool-less removal.
