

SS-703 Microphone

Designed to enable audio in CCTV installations by connecting to IP cameras with mic level audio inputs. With a wide frequency response and simple configuration, the SS-703 microphone provides clear sound and is easy to install.

The audio stream can be used for alarm verification purposes or evidence collection when reviewing a security event.

Product Features

- No external power required - ideal for POE only installations.
- Wide frequency response - suitable for audio analytics
- Designed for mounting in customized enclosures.
- 3.5mm cable connector attached for fast installation
