

All-In-One Functionality

The All-in-One Series of cameras have VIGIL Server and storage onboard, enabling them to function as a standalone recording device. These can also be used in conjunction with a VIGIL DVR for redundant storage capability. As a standalone camera, they are compatible with the entire VIGIL Software Suite, including direct access through VIGIL Client and our mobile app View Lite II, as well as with VIGIL Central Management for remote health monitoring and notification.

What problem are we trying to solve?

As dealers and customers look for more ways to balance and optimize video delivery and video verification, the need for camera-based edge storage and remote accessibility has increased. The VISIX All-in-One feature for select Gen III cameras address these needs with an affordable, redundant, edge-based solution.

- » Ease of installation and configuration with the VISIX Setup App (iOS/Android)
- » Camera health monitoring through VCM
- » Live and recorded footage viewing with VIGIL
- » Client, View Lite II, just like an on-premises server.
- » Redundant solution for critical installations and for backing up on-premises servers to preserve footage in the event of an outage.

How does it work?

Select VISIX cameras with the all-in-one functionality connect to secure VIGIL Connect servers providing a direct connection from the camera to the user to view through the VIGIL Client, View Lite II, and VCM health monitoring. Select alarm monitoring stations can also utilize this direct connection to video for verification as well (contact your alarm monitoring vendor for compatibility). Cameras can also be connected to on-premises servers, providing redundant video backup.

Who can benefit from all-in-one functionality?

Any customer that needs remote connectivity and footage retrieval with or without a server. Customers wishing to install single cameras in remote locations without the cost of an on premises server.

Customers with small camera counts (1-8) per location including those who have multiple locations. Customers who do not have the support staff to maintain on-site servers and infrastructure. VIGIL All-In-One eliminates the worries of antivirus updates, additional software updates and other maintenance needed to support on-site servers. Customers who want complete scalability and reliability of a 1x infrastructure.

Key features

- » Solid state components. No mechanical drives as a failure point.
- » Easy installation, setup and health monitoring through VISIX Setup App, VCM
- » Remote access to live and recorded video through VIGIL Client, View Lite II App (iOS/Android)
- » Edge based video storage options 128GB, 256GB, 512GB and 1TB.
