1. Where is the power supply? I did not find one in the box.

The TK-214i does not require a power supply. It draws power from your computer's USB connections. As long as your KVM switch is connected to the USB port, it will receive the necessary power to function.

2. I have the TK-214i connected properly, but my keyboard and mouse don't work.

1. Make sure your USB ports are working properly by connecting your mouse and keyboard directly to the USB ports on your computers.
2. Once you confirm that your computer's USB port is functional, please reboot all computers, and try to use the KVM switch again.

3. Can I connect and disconnect the USB cables while the computers are turned on?

Yes, you can connect or disconnect the USB cables while the computers are turned on, because the USB interface is Plug-and-Play and Hot-Pluggable.

4. Will the KVM switch remember the keyboard settings between computers?

Yes, the KVM switch will remember the keyboard settings when switching between your computers. (i.e.: Caps lock, Num Lock, etc.)

5. How do I switch from one computer to another with the KVM switch?

PC User: Push button switch ,Universal Hot-Key Commands or USB KVM Switcher Software
Mac User: Push Button switch or USB KVM Switcher Software
[Mac OS X (10.4~10.6)]
Linux User: Push Button switch or Universal Hot-Key Commands

If you still encounter problems or have any questions regarding the **TK-214i,** please contact TRENDnet's Technical Support Department.
