

DesignMax Loudspeakers

System Examples

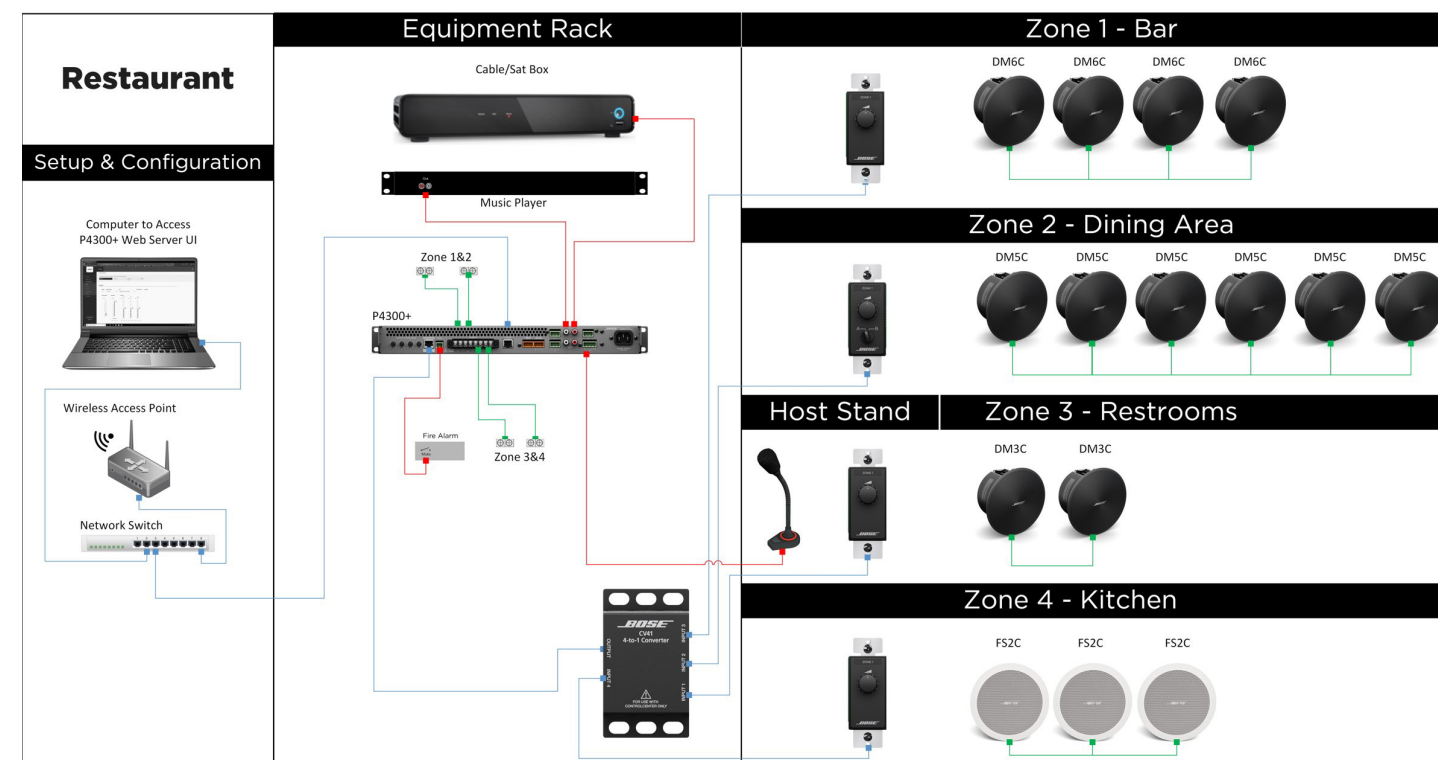

DesignMax in-ceiling models offer a superior dining experience for your guests. The DM5C and DM6C provide the perfect balance of moderate-to-high level background music, enhanced bass response, and voice amplification for public spaces like bars and dining areas. For a mix-and-match installation, pair DesignMax with FreeSpace FS models, such as the FS2C, which are ideal for use in the kitchen due to their use of PC-PBT plastics that are resilient to cooking oil. The PowerSpace 4300+ amplifier ensures that all the loudspeakers in each zone are working at their best. Provide simple controls like the CC-1 and CC-2 for volume and source selection for your staff. Upgrade your restaurant's audio system with DesignMax and enhance the overall dining experience for your guests.

- Zone 1: Bar – Experience Space**
- Premium Sound
 - 10' Between Speakers
 - Speakers @ 10' Height

Designmax Surface mount loudspeakers provide a top-of-the-line audio experience, making them the perfect choice for creating the ideal atmosphere in multi-zone dining areas. The DM8S delivers full-range, powerful audio that's suitable for live performances and entertainment, as well as background listening. The DM6SE is ideal for delivering premium audio outdoors, thanks to its IP55 rating and rust-resistant aluminum grills. The DM5SE and DM2C-LP loudspeakers provide excellent audio for utility and working spaces, ensuring that all communication and guest accommodations are covered throughout the venue experience. Upgrade your venue's audio system with Designmax Surface mount loudspeakers for a truly premium experience.

FULL RANGE BACKGROUND MUSIC

Enhance your fitness facility with DesignMax pendant loudspeakers that will energize and motivate your members with high-SPL foreground music. The DM5P and DM6PE models can be suspended from the ceiling using the included 15-foot cable, providing an immersive and evenly distributed sound experience throughout the space. For added excitement, add the 300-watt DM10P-SUB for deep bass down to 40 Hz. The DesignMax pendant loudspeakers are also designed to seamlessly blend with the rest of the DesignMax line, so you can use the DM3C in-ceiling model for low-level background music in areas like restrooms.
