

# 4K Professional Video Wall Solutions

Create stunning video walls

## 43", 55" and 65" LCD UHD Monitors

American Dynamics Professional Video Wall Monitors produce sharp, true color images that can be used in security rooms and a variety of other applications.

These LCD displays are the perfect solution for Ultra High Definition (UHD) video walls. Equipped with a standalone 3840 x 2160 resolution panel and the ability to take a single video source and display it across multiple panels, they are an excellent choice for command & control centers where fine details are critical.

### Designed for constant use

Unlike plasma technology, LCD video walls require less power. A built-in auto pixel shift feature protects against image burn in of static content making it ideal for constant use.

### Ultra-narrow bezel

Individually mounted consumer grade monitors leave distracting gaps between the screens. With our ultra-narrow bezel monitors arranged in a tiled video wall configuration, there are virtually no inter-screen borders.

## Key Features

- Spread one image across multiple monitors using one video source
- Video wall processor built in
- Remote display management
- Display Port – Input (1)/ Output (1)
- HDMI Inputs (3)/VGA Input (1)/ DVI Input (1)
- RS-232C Input/Output for PC/ Server control
- Control panel lock (panel or IR)
- Auto power recovery
- Auto pixel shift
- All metal chassis
- PIP/PBP/TRI/QUAD displays
- VESA standard hole patterns
