

USB 3.2 Type A Male to Female Active Optical Cable

A flexible solution for when a USB source needs to be extended. Ideal for video conferencing, education, digital signage, and more.

These cables are essential for installers who are looking to extend USB 3.2 products over longer distances up to 99' ft. (30m). The 66' ft. (20m) and 99ft. (30m) cables have an additional micro-USB cable provided for additional power if needed, the shorter lengths do not. This can be used with mice, keyboards, cameras, video bars, storage devices, controllers, computers, NVR's, and more.

Product Features

- USB 3.2 Gen 2 active optical USB cable
- Active chipset and hybrid optical/copper cabling to achieve thinner gauge cabling and long-distance cable runs
- USB Type A (male) to Type A (female)
- Up to 10Gbps bandwidth
- Plug and play with no additional software or drivers
- USB A to Mirco USB cable provided to be used as needed for external power
