

6164US

Custom Alpha Display Keypad with Four Hardwired Zones and One Relay

The 6164US Custom Alpha Keypad contains four integrated hardwired zones that help reduce install, material and inventory costs. This keypad is ideal for applications such as a front door or foyer where hardwiring back to the control panel would not be required. The 6164US also has an on-board relay to control various devices, such as garage door openers.

The 6164US also features a large, bright 32-character display with easy-to-read status messages. The attractive white console blends perfectly with any décor and features a contoured, removable door that conceals the illuminated soft-touch keys. The oversized function keys are easily accessed even when the keypad door is closed and can be programmed for fire, burglary, personal emergencies or other applications. Colored, self-adhesive labels are included.
