

WattBox Power Conditioner with Coax and Ethernet Protection - 4 Outlets

Whether it's a structured wiring can, flat panel TV or cabinet – the WB-200-CE power conditioner provides premium surge protection and noise filtration to 4 outlets, as well as coax and Telephone/Ethernet protection. And don't let its size fool you. Its outside is just as rugged as the protection it offers, with an 18-gauge steel chassis and built-in wings for mounting.

INSTALLABILITY IS KEY

Our product team designed this WattBox 200-series power conditioner with a slim form factor and integrated mounting ears. The mounting holes line up with a range of install solutions for a quick and easy install.

POWER ADAPTERS WELCOME

Bulky power supplies, or wall warts, can be a real pain to deal with during the install. We've oriented the outlets to make them easier to plug in when installing against the wall, cabinet, or in a structured wiring can.

FIREPROOF MOVs

MOVs, or Metal Oxide Varistors, are surge protection components that dissipate excess energy in the form of heat. WattBox power conditioners feature ceramic-encased MOVs to protect not only your system but your home as well.

WattBox Power Conditioner with Coax and Ethernet Protection - 4 Outlets

WB-200-CE-4

Breaker Switch Rating	15A
Coaxial Protection	1 In - 1 Out
Current Rating	12A
