Drawing on 35 years of market-leading expertise in the enclosures that house and protect audiovisual systems, Middle Atlantic Products has developed a suite of stylish furniture solutions that present a striking symmetry of technology and design. Technology is moving from dedicated equipment rooms to more localized positions in conference rooms, collaboration spaces, lecture halls and more. This trend inspired our Frame to Furniture™ approach which combines a strong foundational frame to protect and maintain equipment with custom wood exterior finishes. This unique line of furniture results in a product that helps ensure reliable systems, offers flexibility for future growth and has the attractive features that modern spaces demand.
