

Product Environmental Profile

Wiremold Evolution™ Series Recessed and Furniture Feed Poke-Thru Devices

COMPANY OVERVIEW

• Sustainability built in to support our associates, customers, and the environment

At Legrand North and Central America, we're committed to leading by example within our own operations, to developing high quality solutions for our customers' High Performance Buildings, and to transforming how people live and work – more safely, more comfortably, more efficiently.

• Better Performance

A core principle of designing for sustainability drives us to innovate products and systems that enable buildings to reach exceptional levels of performance, bringing about industry-leading ideas, inventions and initiatives.

• Better Operations

A commitment to a leadership role in operational excellence through environmental management, optimizing the way we manage energy, water and waste.

• Better Lives

A dedication to enhancing employee and community welfare through programs that help people enjoy healthier, more productive and more rewarding lives.

For more information on Legrand's PEPs and other sustainability initiatives, visit legrand.us/sustainability.

LEGRAND'S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 85% are ISO 14001 certified (sites belonging to Legrand for more than five years).

• Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

<p>Function</p>	<p>Distribute the power, communications, and audio video services to open spaces via 2x 20A duplex power receptacle wiring accessories for 20 years.</p>
<p>Reference Product</p>	<div style="text-align: center;">  </div> <p style="text-align: center;">Cat. No. 8ATC2PBK</p> <p style="text-align: center;">Evolution™ 8ATC2P Series Recessed Prewired Assembly with Surface Style Cover</p>

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

Product Environmental Profile

Wiremold Evolution™ Series Recessed and Furniture Feed Poke-Thru Devices

PRODUCTS CONCERNED

The environmental data is representative of the following products:

- 8ATC2PBK, 8ATC2PGY, 8ATC2PBS, 8ATC2PBZ, 8ATC2PNK, 8ATC2PAL
- 6ATC2PBK, 6ATC2PBS, 6ATC2PBZ, 6ATC2PGY, 6ATC2PNK, 6ATC2PAL
- 6ATCFFBK, 6ATCFFBS, 6ATCFFBZ, 6ATCFFNK, 6ATCFFGY, 6ATCFFAL

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market.

It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EC.

Total weight of Reference Product with unit packaging	7390 g (16.29 lbs)
--	---------------------------

Plastics as % of weight		Metals as % of weight		Others as % of weight	
Product					
PP	17.7 %	Steel	27.5 %	Coating Paint	0.4 %
PE	2.8 %	Aluminum	11.2 %		
Other Plastics	1.1 %	Other Metals	2.0 %		
PVC	0.9 %	Zamak	0.6 %		
SBS	<0.1 %	Copper Alloys	0.4 %		
PET	<0.1 %				
PU	<0.1 %				
Packaging					
PE	<0.1 %			Wood	24.2 %
				Paper	11.1 %
Total plastics	22.6 %	Total metals	41.7 %	Total others	35.7 %

Estimated recycled material content: 25 % of weight.

MANUFACTURING

The Reference Product comes from sites that have received ISO14001 certification.

DISTRIBUTION

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. Information on the distance of distribution reflects the PCR hypothesis for "Intracontinental transport", 2175 miles (3500 km) by heavy truck. This represents transportation of the reference product from our warehouse to the local point of distribution in the North American market.

Product Environmental Profile

Wiremold Evolution™ Series Recessed and Furniture Feed Poke-Thru Devices

INSTALLATION

For the installation of the product, the drilling of a hole was not taken into account due to insignificant impact according to PSR-0003-ed1.1-EN-2015 10 16. The addition of silicone was not taken into account based on PSR-0003-ed1.1-EN-2015 10 16.

USE

Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

Consumables:

No consumables are necessary to use this type of product.

END OF LIFE

• **Hazardous waste* contained in the product:** no hazardous waste
(* Hazardous waste as defined by European Commission decision 2000/532/EC.

• **Recyclability rate:**

Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the Reference Product without packaging is estimated as 96 %. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:	(% mass of Reference Product excluding packaging)
- plastic materials:	32 %
- metal materials:	65 %
- other materials:	< 0.1%

Recycling rate of all packaging (all types of materials): 96%

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use, and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

Manufacturing	Packaging was taken into account. As required by the PEP ecopassport program, all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. The waste generated during manufacturing phase has been taken into account.
Distribution	Transport between the last distribution center and an average delivery to the sales area. The default scenario modelled maximizes the environmental impact using the PCR hypothesis for "Intracontinental transport": 2175 miles (3500 km) by heavy truck.
Installation	The end of life of the packaging is taken into account at this phase (transport of packaging to end of life treatment).
Use	<ul style="list-style-type: none"> • Under normal conditions of use, this type of product requires no servicing or maintenance. • No consumables are necessary to use this type of product. • Product category: Pre-equipped service poles, service posts and multi-outlet extensions. • Use scenario: non-continuous operation for 20 years at 30% of rated load of the time. This modelling duration does not constitute a minimum durability requirement • Energy model: Electricity Mix (US) - 2009
End of life	The default end of life scenario modelled maximizes the environmental impact using the PCR hypothesis for "Local transport": 621 miles (1000 km) by heavy truck and landfilling.
Software used	EIME V5 and its database "CODDE-2018-11" and the indicators defined in the PCR ed3 in alignment with the EN15804 standard

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website. The value of these impacts are valid for the context specified in this document. They must not be used directly to draw up the environmental balance sheet for the installation.

% ENVIRONMENTAL IMPACT PER LIFE CYCLE STAGE OF REFERENCE PRODUCT

The environmental impact of the Reference Product occurs predominantly during the manufacturing phase.

Product Environmental Profile

Wiremold Evolution™ Series Recessed and Furniture Feed Poke-Thru Devices

ENVIRONMENTAL IMPACTS (continued)

For products other than the Reference Product, the environmental impacts of each phase of the life cycle are calculated with the following extrapolation rules:

Part	Manufacturing	Distribution	Installation	Use	End of Life
8 INCH (8ATC2P)	1.0				
6 INCH (6ATC2P & 6ATCFF)	0.6	0.7	0.8	1.0	0.6

Registration number: LGRP-00313-V02.01-EN	Drafting rules: PCR-ed3-EN-2015 04 Supplemented by PSR-0003-ed1.1-EN-2015_10_16
Verifier's accreditation number: VH34	Information and reference documents: www.pep-ecopassport.org
Date of issue: 12-2022	Validity period: 5 years
Independent verification of the declaration and data, in compliance with ISO 14025:2010 Internal <input checked="" type="checkbox"/> External <input type="checkbox"/>	
The PCR Review was conducted by a panel of experts chaired by Philippe Osset (SOLINNEN).	
The elements of the present PEP cannot be compared with elements from another program.	
Document in compliance with ISO 14025:2010: "Environmental labels and declarations - Type III environmental declarations"	
In compliance with ISO 14040:2006: "Environmental management – LCA – Principles and framework" In compliance with ISO 14044:2006: "Environmental management – LCA – Requirements and guidelines" In alignment with EN 15804:2012+A1:2013: "Sustainability of construction works - EPD's - Core rules for the product category of construction products"
