### ■ LEGRAND COMPANY OVERVIEW ■

### • Designed to Be Better - Our Commitment to Sustainability

At Legrand®, our sustainability commitment translates into greater benefits and tangible value for our customers, business partners, employees, and the broader community.

### • Better Performance

We provide building solutions to meet many building performance goals from sustainability and energy efficiency to productivity and occupant well being. The right choice in network and electrical infrastructure can play a key role in many facets of building performance. Our products help ensure electrical safety. They offer choice and flexibility in space design. They are designed to reduce installation time and material waste on site. Because we know buildings consume a great deal of energy, we offer a range of products and solutions that reduce energy consumption from lighting to plug load to data centers.

#### Better Solutions

We offer a wide range of innovative solutions for the building, while constantly evolving our design and development processes to improve the environmental profile of our products. Through active monitoring and research, we serve as an expert resource for market trends and building and product performance standards to keep our customers at the top of their game.

### • Better Operations

We focus on operational excellence because we believe optimizing the way we manage energy, water and waste is not only good for the environment, it's good for business. As part of the Department of Energy's Better Building, Better Plants Challenge (BBBP) Legrand has reduced its energy intensity by over 30% across 14 sites in the United States in just three years. Integrating sustainability into the way we run our operations makes us more competitive – and a better business partner.

### LEGRAND'S ENVIRONMENTAL COMMITMENTS I

### • Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 85% are ISO 14001 certified (sites belonging to Legrand for more than five years).

### • Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

### • Involve the environment in product design

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

Estimated recycled material content: 62% of weight.

### ■ MANUFACTURING I

This Reference Product comes from sites that have received ISO14001 certification.

### ■ DISTRIBUTION ■

Products are distributed from logistics centers located to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 2175 miles [3500km] by truck from our warehouse to the local point of distribution into the market in North America.

### ■ INSTALLATION ■

For the installation of the product, only standard tools are needed.

### USE I

### Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

No consumables are necessary to use this type of product.

### ■ END OF LIFE ■

Development teams integrate product end-of-life factors in the design phase.

• Hazardous waste\* contained in the product: no hazardous waste

(\*) Hazardous waste as defined by European Commission decision 2000/532/EC.

 $Calculated using the method described in the IEC/TR \, 62635 \, technical \, report, \, the \, recyclability \, rate \, of \, the \, product \, is \, estimated \, as \, 87\%.$ This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

### ■ ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use, and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

Manufacturing	Packaging taken into account. As required by the PEP ecopassport program all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. The waste generated during manufacturing phase has been taken into account.
Distribution	Transport between the last distribution center and an average delivery to the sales area.
Installation	Installation components not delivered with the product are not taken into account. The end-of-life of the packaging is taken into account at this phase.
Use	<ul> <li>Under normal conditions of use, this type of product requires no servicing or maintenance.</li> <li>No consumables are necessary to use this type of product.</li> <li>Product category: envelope (as enclosure)</li> <li>Use scenario: No energy consumption during the 20 year working life. This modelling duration does not constitute a minimum durability requirement.</li> <li>Energy model: Electricity Mix (US) - 2009</li> </ul>
End of life	The default end of life scenario maximizing the environmental impacts.
Software used	EIME V5 and its database "CODDE-2015-04" and the indicators defined in the PCR ed 3 in alignment with the EN15804 standard

### Wiremold® OmniBox Floor Boxes Powder-Coated Aluminum Cover Plates

### ■ ENVIRONMENTAL IMPACTS (continued) ■

The impacts are the same regardless of the flange type, the finishing color and which cover plates are used. For example the differences between the 817TCAL-XX\* and 817TAL-XX is negligible. Likewise, the 828TCAL-XX series plates have nearly identical impacts to the 829TCAL-XX series plates, making them interchangeable in the study. However, the flange size must be taken into account by multiplying the reference product's impacts by the following extrapolation ratios:

Part Number	Manufacturing	Distribution	Installation	Use	End of Life
817TCAL-XX + 1 Plate	0.7	0.6	0.7		0.6
827TCAL-XX + 2 Plates	1	1	1		1
837TCAL-XX + 3 Plates	1.5	1.4	1.3		1.5
