

Weatherproof, Non-metallic Keypad Enclosures

Arlington's non-metallic keypad covers protect an exterior system keypad against bugs, moisture and weather, turning a keypad that's not weatherproof into a weatherproof enclosure – fast! They are suitable for interior systems too.

Our surface mount keypad covers accommodate single, two-gang or 4x4 boxes. That's important when local codes require a box or enclosure for power and low voltage applications. They have a universal mounting pattern, so they mount horizontally or vertically. And, you can mount them without a box on flat surfaces for low voltage keypads.

For low profile good looks, try Arlington's recessed IN BOX™ keypad enclosures. They install easily and securely to a variety of exterior surfaces through four mounting holes... without the need for gaskets.

The new one piece DBLV series enclosures install a power or low voltage keypad in the wall so less shows outside. Only the cover extends beyond the wall.

- White non-metallic 2-gang recessed enclosure with heavy-duty, clear or paintable white plastic cover
- Styles for new construction: stucco, textured surfaces, vinyl and rigid siding – and retrofit
- Fits most keypads and digital controllers
- Inside dimensions: 5" x 5"
- Textured, paintable trim plate covers edges of finished wall surface
- Horizontal or vertical mounting (raintight ONLY when mounted with latch at bottom)
