Item# 60012 / 60013

RapidRun® Plenum-Rated Multi-Format Runner Cable

Optimized for high density, multi-format signal applications over a single cable

RapidRun is designed to be the standard for in-wall audio/video installations. The RapidRun system allows for customization of installations creating an ideal audio/video solution. Break-away flying leads and wall plates ensure flexible, efficient, high quality connections for all types of equipment.

RapidRun Multi-Format represents the most significant upgrade to the RapidRun cabling solution to date. With enhanced engineering that includes individually shielded pairs and an isolated ground for audio lines, this runner cable meets the rigorous demand for applications in which multiple audio/video devices are run over a single cable. In classrooms, for example, teachers commonly need to connect a laptop and DVD player to the classroom's projector. With multiple outputs on each piece of equipment (VGA, 3.5mm audio, composite video and dual RCA audio), providing a single cable to distribute these signals saves installation time and money for the integrator, the installer and the school.

With the advent of the "Analog Sunset" in 2014, digital solutions are being developed to expand the RapidRun Multi-Format line. These solutions make this innovative system ideal for environments where analog equipment will eventually be upgraded. Use this CMP-rated multi-format runner for in-wall installations that support high-density, multi-format applications. Whether hanging a projector in a modern 21st century classroom or installing a commercial digital signage system, a clean, crisp signal will be delivered every time. Terminate with flying leads, or with wall plates to meet the specific requirements of each installation.

Please note: Each complete RapidRun Multi-Format runner solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Features:

– Color code: Orange
– CMP-rated for in-wall installations
– Delivers crisp video and high fidelity audio from source device to display
– Integrates all technology in the room with a single cabling system—laptops, projectors, DVD players, interactive whiteboards and more
– Optimized for high-density signal applications—including VGA, 3.5mm, composite video, stereo audio RCA, plus future upgrades for HDMI
– Unique protective pulling cap withstands 30 pounds of tension, allowing cable to pull easily through walls and existing conduit—even 90° field bends
– Future capability to support either analog or digital signals over the multi-format runner cable

– Warranty: Lifetime
– Color: Black
– Mfr: Cables To Go
