

Designed with ultra-strong neodymium magnets and a cylindrical head with rubber-coated wheels, this magnetic cable retrieval system makes it quick and easy to pull wire through drywall, finished walls, and other tight spaces without damaging or scuffing the surface. This magnetic cable retrieval system also features the following:

- Ultra-strong neodymium magnets easily find and hold the drop magnet through walls for easy wire and cable pulling
- Rubber coated cylindrical head smoothly rolls on walls without scuffing or damaging them
- Ergonomic plastic handle with finger grooves provide maximum control and comfort
- Drop magnet with pull line has stainless steel housing to prevent damage and corrosion, with an eyelet at the other end for pulling wire or cable
- Due to its strong magnetic properties, the retriever unit can also be used as a stud finder
- Hard plastic carrying case with handle makes it easy to transport and store the system
- Patented
- Lifetime Warranty
