FLBC4500LR

Both fit installed 4-1/2" round concrete boxes

Arlington's **Box Extender/Leveling Ring** is the solution for adding depth to an installed round concrete box.

New flooring installed? Cover not fitting on the installed concrete box? FLBC4500LRBE is perfect for times when the finished floor is too high. This box extender extends an installed 4-1/2" round box up to 2" – and allows for a level cover installation.

The installation of a new floor makes this installed box too deep for the box cover to fit properly.

Install the cover (not included) on FLBC4500LRBE. Wire receptacle. Insert the assembly in the opening and glue it in place.

Problem solved! FLBC4500LRBE extends box depth up to 2".

- Easy to install
- Fits installed 4-1/2" round concrete boxes like Arlington's FLBC4500, and others

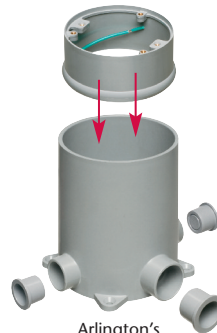

This installed box needs leveling.

Install the cover (not included) on the FLBC4500LR. Glue the entire assembly to floor.
