

When a standard USB cable cannot transfer enough power to operate an external device, such as a portable 2.5in hard drive, you need a USB 2.0 y-cable. Simply plug this cable's USB B end into the device, and then plug the two USB A ends into open USB ports on one PC or Mac. This cable then pulls power from both USB ports, and thus increases the output to the external drive.

The red molded hood on the auxiliary USB A connector enables the user to quickly distinguish between main and auxiliary power. Foil and braid shielding reduces EMI/RFI interference, and twisted pair construction reduces crosstalk for high speed, error-free data transfer. This cable is compatible with USB 1.0, 1.1, and 2.0 specifications.

Please Note: This cable is not designed to split USB signals to multiple computers. The two USB A connectors are meant to plug into USB ports on the same computer.

Features & Benefits

Pulls power from USB ports and increases the output to an external drive

Specifications

General Info

Product Line	C2G	UPC Number	757120281085
Country Of Origin	China	Application Sector	Residential, Commercial
Type	Cable		

Dimensions

Cable Length	6 ft
--------------	------

Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
--------------------------	-----	--------------------------	------------------------------

Technical Information

Jacket Material	PVC (Polyvinyl Chloride)	Cable Type	USB
-----------------	--------------------------	------------	-----

Amperage

100 mA

Data Transfer Rate

480 Mbps

Adapter Rear

USB-A Male, USB-A Male

Adapter Front

USB-B Male
