Arlington's **Countertop BOX KITS** give you *lots of options* for installing a device in a countertop.

Get your kit with an installed UL Listed tamper and weather resistant (TWR) decorator-style GFCI... Or tamper resistant (TR) receptacle... OR a combo with (TR) receptacle and two USB ports!

The gasketed, stainless steel or black TRAPDOOR COVERS look great! They close flush with the countertop, providing 'ingress protection' and preventing damage to the devices in the box.

Easy, secure installation

The spring clip holds box securely against the surface when the screws are tightened. And, the clip is 'bendable' so it's easy to insert into the opening in the countertop

- Fits granite or other countertop material up to 1-1/2" thick
- Easy 'No Glue' installation
- Complies with NEC section 406.5 (E) for use in countertops or similar work surfaces

- Ingress Protection Rated

Easy, secure 'NO GLUE' Installation

1 Determine box location. Cut 4- 7/16" square opening in countertop. Insert box, bending the clip as necessary to go through opening.

2 Secure box to countertop by tightening two #10 screws inside box...

3 ...drawing the box securely against the underside of the counter. NO GLUING!

4 Wire receptacle in accordance with National, State and local codes.

5 Install trapdoor coverplate to box using the two #6-32 screws provided.

6 Done.
