

Quickly customize the length of your home theater or broadcast video cables with these connectors. Nickel-plated brass provides years of reliable service. Barbs within the connector centerpin provide a reliable signal path, and ensure a positive connection to the cable's center conductor. These connectors are a breeze to install and more reliable and easier to use than traditional hex crimp BNC connectors.

Simply prepare the cable in the same manner as an f-type connector, insert the connector onto the coax cable and compress it with the 3-in-1 compression tool (item #38011).

Features & Benefits

Provides a reliable connection which is resistant to moisture Compatible with broadcast video and CCTV Surveillance signals
Designed for use with dual shield RG6 cable

Specifications

General Info

Product Line	C2G	UPC Number	757120411253
Country Of Origin	Taiwan, Province Of China	Application Sector	Residential, Commercial
Type	Connector		

Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
