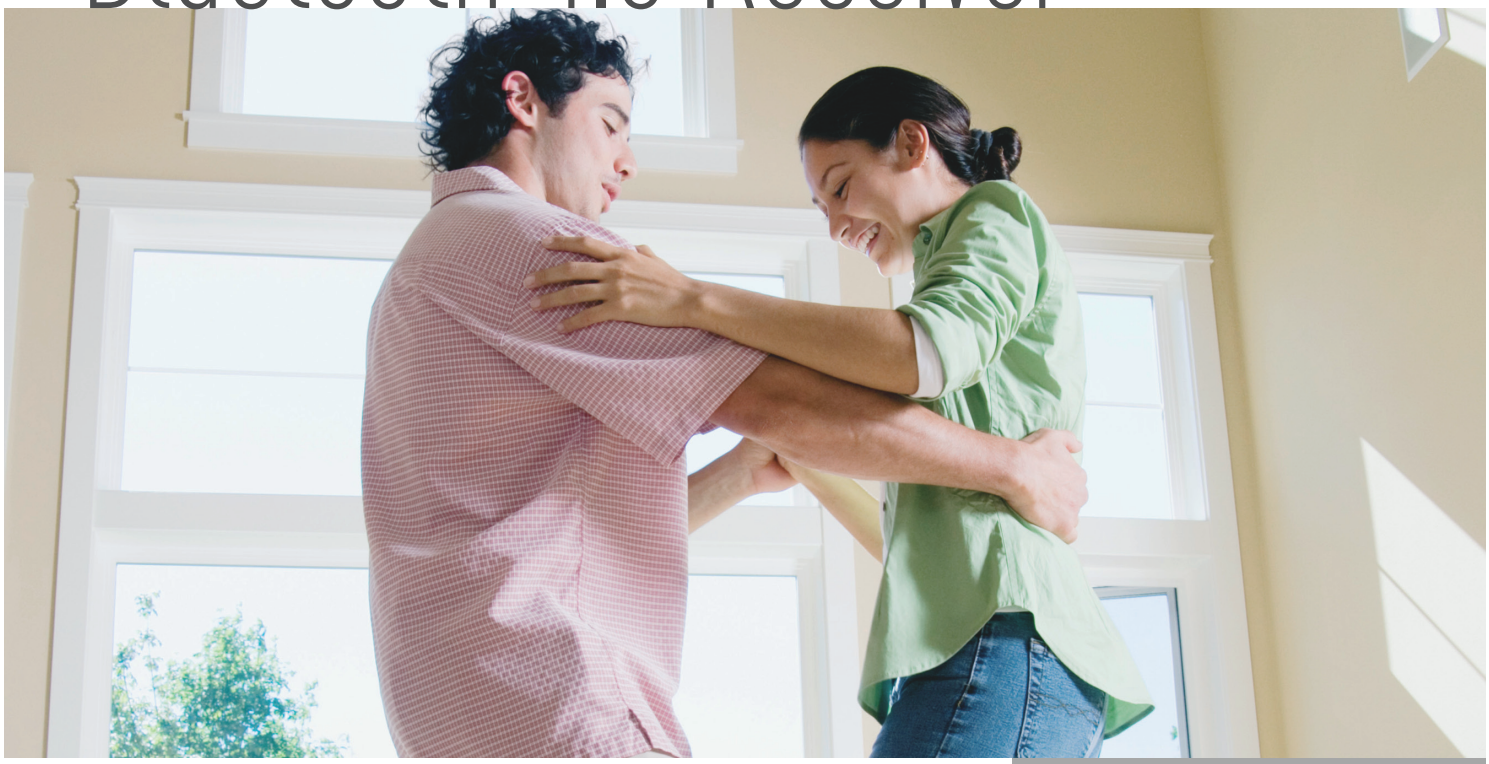
AU8001

# Bluetooth 4.0 Receiver



## BLUETOOTH CONNECTIVITY. ON-Q INNOVATION. SUPERIOR SOUND

On-Q products by Legrand continue to advance the capabilities of home entertainment, pushing sound quality and media connectivity all the way to 11.

Our new On-Q Bluetooth 4.0 Receiver is a home audio must-have that easily links music libraries or services from any Bluetooth-ready smartphone, tablet or digital music player to your home stereo or On-Q lyriQ audio system.

Connect to the On-Q lyriQ source inputs using the supplied cables. Connect to any other amplifiers line level inputs and add Bluetooth as a source.

Using the aptX digital audio codec, send CD-quality sound from a compatible device to any home stereo set-up. Don't have a device that supports aptX? The On-Q Bluetooth 4.0 Receiver also supports the Advanced Audio Distribution Profile (A2DP) to ensure a pure, high-quality music connection is always at your fingertips.

Powered by a standard AC outlet and including a USB port for device charging, our Bluetooth 4.0 Receiver is the ideal mobile audio partner for your On-Q lyriQ multi-room system.

## FEATURES
