

# LOW PROFILE, RECESSED **IN BOX** WITH METAL OUTLET BOX

Arlington's new **IN BOX™**, with a metal outlet box, is designed for use in residential and commercial projects with metal raceway systems.

## Recessed box

Perfect for installing receptacles outdoors, the job looks great.

## **IN BOX installs in the wall – so less shows outside!**

It's a 25.0 cu. inch metal outlet box with a weatherproof in-use clear or white cover. Plus, we have a style for retrofit; new brick, new vinyl siding and stucco or textured surfaces.

Meets 2008 NEC, Section 406-8 where a weatherproof-in-use cover is required for 15 or 20 amp receptacles installed outdoors.

- No gaskets required – Accepts single-gang devices
- Uses standard and decorative indoor wall plates

Patent Pending.

Colors: Brown box w/ clear cover only • White box w/ clear or white cover
