

PATCH
CORDS

Signamax continues to set the standard for high-quality, high-performance patch cords. These Category 6 cables are manufactured to the strictest performance requirements as specified in TIA/EIA-568-B.2-1 using the highest-level connector design and cable construction. Signamax category 6 patch cords incorporate slim-profile snag-free boots, which protect the plug latch, and a flexible, but durable cable strain relief. Cables can be ordered with or without the snag-free feature on the connector boot, but all patch cords use a special new connector design that assures maximum pair twist for unparallelled transmission performance and signal integrity. All cords are 100% transmission tested in a Category 6 channel to ensure performance and are compatible with T568A and T568B cabling systems.

Category 6 Patch Cords

Model
C6-154BU

CAT 6

Category 6 Patch Cords with Snag-Proof Boots

PART NO.	DESCRIPTION
C6-114CC-LFB	Category 6 Patch Cord Snag-Proof Boot

For cable color substitute **CC** for color in P/N

BK=Black	BU=Blue	GN=Green	GY=Gray
OR=Orange	RD=Red	WH=White	YE=Yellow

For standard lengths substitute **L** for length in P/N. Other lengths are available.
3=3 ft. 5=5 ft. 7=7 ft. 10=10 ft. 14=14 ft. 25=25 ft.

Category 6 Patch Cords with Non Snag-Proof Boots

PART NO.	DESCRIPTION
C6-154CC-LFB	Category 6 Patch Cord Non Snag-Proof Boot

For cable color substitute **CC** for color in P/N

BK=Black	BU=Blue	GN=Green	GY=Gray
OR=Orange	RD=Red	WH=White	YE=Yellow

For standard lengths substitute **L** for length in P/N. Other lengths are available.
3=3 ft. 5=5 ft. 7=7 ft. 10=10 ft. 14=14 ft. 25=25 ft.
