

PSR-5
Power Supply

Power Supply for SR-50 Sub Racks

Features:

- ◆ Universal Power Input
- ◆ High Efficiency
- ◆ Current Limiting
- ◆ Over Voltage Protected
- ◆ Internal Cooling Fan
- ◆ Detachable Line Cord
- ◆ Power Indicator
- ◆ UL Listed E194293 DRQH

SPECIFICATIONS:

Input:

Voltage 100 to 240 VAC
 Frequency..... 50 – 60 Hz
 Power 120 Watts Max
 Connector IEC C14 Male

Output:

Voltage ±15 VDC
 Power 100 Watts

Environmental:

Temperature (Operating)
 -40°C to +75°C, non-condensing

Physical:

Size:.....6½" x 2.8" x 5"
 Mounts in Power Supply Slot of
 SR-20 Series Sub Racks
 Weight: 2.6 lbs (1.2 Kg)

The American Fibertek PSR-5 power supply is a plug in unit for the SR-50 series of sub rack frames. The PSR-5 provides AC to DC conversion from mains voltage and supplies power to the distribution bus of the SR-50 series sub rack.

As a system, the SR-50 and PSR-5 can be combined with applications cards including transmitters, receivers and transceivers for a large variety of fiber optic video, voice and data applications.

The PSR-5 and SR-50 are replacements for the PSR-2 power supply and SR-20 Subrack.
