## VSM

Management Platform for VIA Devices

---

VIA Site Management (VSM) is a software application that allows an administrator to manage, monitor and make changes to all connected VIA GO, VIA Collage, VIA Connect PRO or VIA Campus gateways

## FEATURES

---

**Deployment** - Easily on-board all your VIA devices across networks

**Management** - Organize VIA devices and create settings templates

**Configuration** - Set defaults and configure features

**Health Checking** - Monitor storage level, On/Off statuses, and current firmware version

**Usage Analytics** - Create usage reports for all of your VIA devices

**Alerts** - Set customized messages to display on VIA screens as needed

**Digital Signage** - Manage content, create templates and schedule campaigns

**Automated Device Updating** - Schedule and automatically push new firmware updates
