

Constant connectivity is essential in today's wireless world

COUNT ON SURECALL TO DELIVER

SpeedLink 5G is the #1 C-band booster for large buildings.

Instantly expand 5G coverage, deliver ultra-fast data speeds up to 1 Gbps, and increase network capacity with SpeedLink 5G. It is the only C-band signal booster approved by Verizon for use on their 5G Ultra Wideband (UWB) network in addition to being FCC-certified for immediate deployment.

Installs quickly and economically inside offices, enterprise buildings, and commercial spaces without the need for fiber backhaul.

SpeedLink 5G is a Verizon C-band compatible system (3.7-3.84 GHz) equipped with features enabling it to boost the wider C-band spectrum, for future-proofing and the ability to cover multiple carriers. It can also be installed in tandem with existing 4G/LTE 5-band booster systems.

- Best-in-class RF performance and fastest 5G data speeds
- 24/7 cellular uptime for continuous peak performance
- Built-in SureCall Cloud™ remote status checks with the industry's most advanced booster management and control suite
- Easy-to-use Bluetooth mobile app provides real-time performance readings to identify optimal setup and antenna aiming during install
- Includes SureCall's Expert System Design Services
- Industry best 3-year manufacturer's warranty
- Proudly American-owned and operated since 2001

High-performance products engineered and built in the USA.

We are dedicated to going above and beyond for our customers – providing people and businesses everywhere with enhanced 5G signal. SureCall has been the first-to-market pioneer of innovative booster solutions since 2001, which is why clients like NASA, Marriott, Chrysler, HP, Kaiser Permanente, and other Fortune 500 companies trust us to help keep them connected and productive. Reach out today to get started.
