

Pro Series Video Doorbell

The reliability of single-source power and internet—plus all the standard doorbell capabilities

Expand into new markets while still offering an NDAA-compliant* solution with 2MP video, People Detection, and Two-Way Audio.

Key Features

Reliable power and internet

Power over ethernet means the VDB755P operates independently of traditional transformers and chime wires. Plus, it maintains operations even if there is Wi-Fi interference.

Interactive Smart View

The VDB755P can be connected to an Alarm.com SVR** or CSV for continuous recording. This gives customers access to the Smart View player—accessible anytime from web and mobile—so they can easily review footage, find key events, and identify clips for download.

Flexible installation

The VDB755P can be installed on a single-gang box or surface mounted. Additionally, it is compatible with mechanical, digital chimes, and the Alarm.com Smart Chime (ADC-W115C).

Visit the Alarm.com Partner Portal to access service package pricing, installation, and support resources.

**All information herein is accurate as of November 1, 2023.*

Read our NDAA statement at alarm.com/legal for additional information.

***The VDB755P is not compatible with the Alarm.com SVR100 or SVR122.*
