

# Gain efficiency with a comprehensive maintenance plan

## Advantage Service Plan

### Re-think Maintenance for Modular Data Centers

Companies around the world are increasingly becoming high tech and data resilient. Whether that occurs in the classroom, remote military bases, healthcare organizations, or within colocation facilities, **the demand for prefabricated data centers is growing**. Why? They solve three, often competing, objectives. How do I increase flexibility, be faster to market, and improve my predictability without disruption?

Now, Advantage Service Plans for EcoStruxure Modular Data Centers combine individual maintenance options by integrating the UPS, Cooling, Switchgear and Enclosure into **one comprehensive, system level service**, optimizing performance and helping prevent downtime.

Receive 24/7 remote technical support and next-business-day on-site response

Spend less time managing multiple vendors

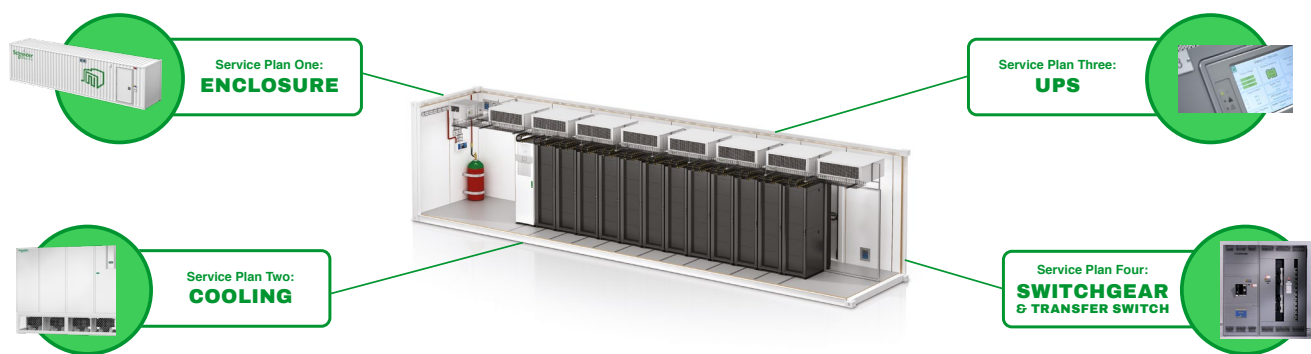

Help lower your operational budget and avoid unexpected maintenance costs

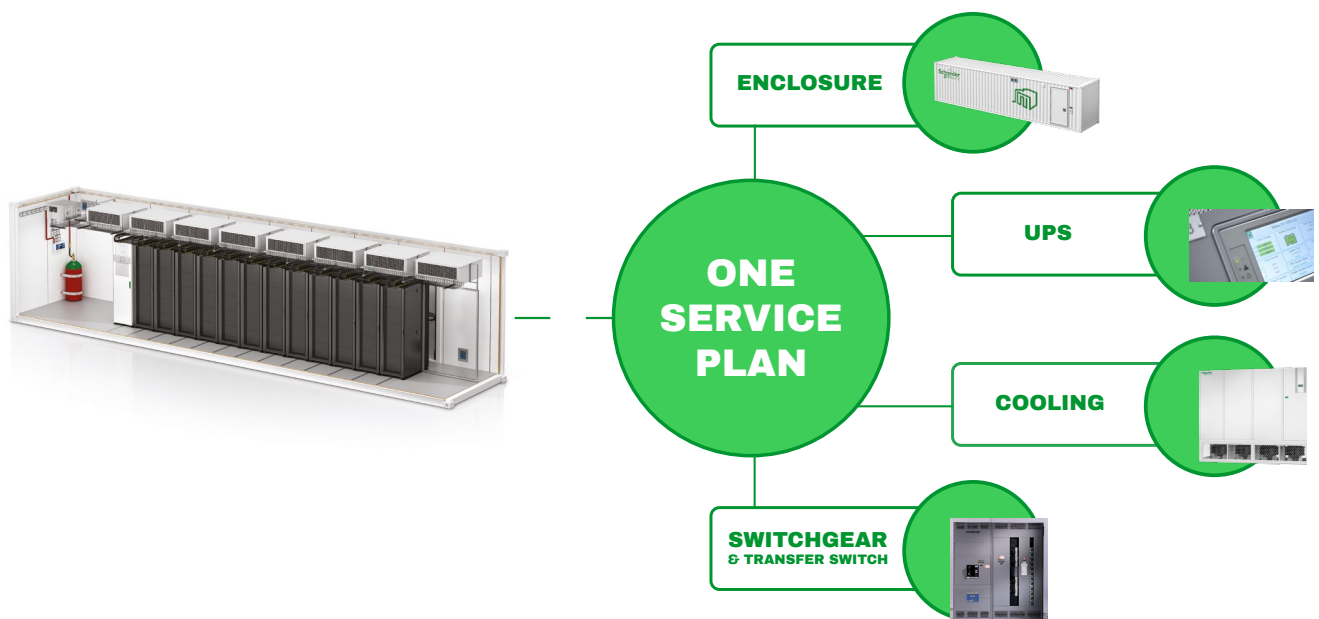

# Simplifying your Maintenance Approach with an Integrated, System-level Service

With the rapid pace of changes in technology and ongoing budgetary challenges, problems with components can be difficult to address. Our new service plan for modular data centers can help you reduce the complexity and maximize your operational efficiency.

From service plans at the component level

To one service plan for all critical IT components

# Service Tiers & Features

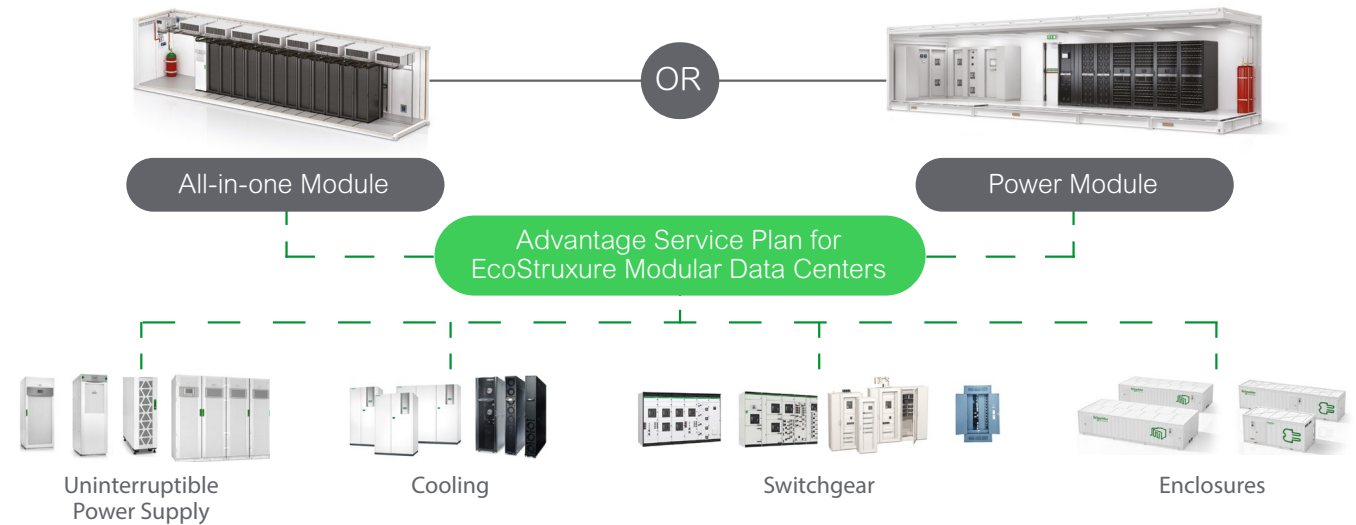

This maintenance plan can be added to any existing or new All-in-one or Power Modules. Browse below to learn more about the available options, features, and components covered.
