WATTBOX®

Get Smart(er) Power:
Introducing the New WattBox 800 Series Faceplate

Control and Monitoring

Take charge with the new standalone WattBox 800 Series Faceplate. Enjoy the power of the 800 series with the ultimate local control and monitoring for up to three 800 series WattBox PDUs with an integrated display and indicator LEDs, showcasing ground status, internet connectivity, safe voltage, current, voltage, and surge protection status.

Three Lines of Defense

Ultimate Control and Flexibility

The WattBox 800 Series Faceplate brings control to not just one, but up to three, WattBox 800 Series PDUs for ultimate control and flexibility. Use the buttons on the faceplate to cycle through individual PDUs and reset locally.

1U Rack Mountable

The 800 series has a slim 1U rack-mountable form factor allowing it to easily be incorporated into nearly any job.

Power When You Need It

On the front of the faceplate, an individual outlet and two USB charging ports are conveniently accessible for charging tools or as a quick power resource for customers. On the back of the faceplate, two additional USB charging ports are available.
