PIONEERING THE WORLD OF TESTING TECHNOLOGY

As the world's only ISO 9001 Approved Manufacturer of detector testing products we can offer you an unrivalled choice of solutions to meet your specific needs.

We work in partnership with all the leading detector manufacturers to ensure that our products are compatible and safe to use with the widest range of detectors across the world.

As well as the endorsement of detector manufacturers, core products are UL certified and all products support safe and efficient functional testing - compliant with industry codes and standards.

ALL THE EXPERIENCE TO HELP FIND YOUR RIGHT SOLUTION

100+ Staff

Staff working in the
UK, USA, Europe,
Middle East & India.

Global Leader

Products distributed
to 130+ countries
and counting.

GLOBAL COMPATIBILITY

Over 500 detectors in one room might seem a little excessive, however for the Test Labs onsite at our Hertfordshire base it is exactly what is needed!

These, along with the expertise and experience of our in-house technical team, mean we are able to test our products against detector makes and models from around the world – ensuring the detectors activate as intended and alerting us to any trends or unique results.

This amount of testing and level of expertise is vital to our success and we know it really matters to our customers.

Our products perform a vital life safety role, if you use them you need to be able to trust that they will work in a reliable and efficient manner and offer a solution for all the detectors you are likely to discover on-site.

With a worldwide customer base, compatibility testing is no easy feat, as a result the 500+ detectors in our lab include detectors of different profile, design and age. It takes a lot of science and testing to get things right – in the build-up to the launch of a new product, it's not uncommon for our technical team to run in excess of 10,000 tests – just to ensure the best possible results and the ultimate performance in terms of compatibility and efficiency.

INDUSTRY STANDARD

Functional testing of fire detectors should be carried out as described in BS5839-1.

Smoke Detector Testing

"Point smoke detectors should be functionally tested by a method that confirms that smoke can enter the detector chamber and produce a fire alarm signal (e.g. By use of apparatus that generates simulated smoke or suitable aerosols around the detector). It should be ensured that the material used does not cause damage to, or affect the subsequent performance of the detector…."

BS:5839-1: 2017 Clause 45.4 (d) – Smoke

What this means
- Approved by detector manufacturers
- Safe to use on the detector
- Considerate of the immediate environment
- Free from harmful contents

Multi-Sensor Detector Testing

"The guidance of the manufacturer on the manner in which the detector can be functionally tested effectively should be followed."
"..multisensor fire detectors should be physically tested by a method that confirms that products of combustion in the vicinity of the detector can reach the sensors and that the appropriate response is confirmed at the CIE."

BS:5839-1: 2017 Clause 45.4 (j)

What this means
- Approved by detector manufacturers
- Capable of delivering stimuli simultaneously
- Deliver a fast effective means of testing
- Safe for the detector and immediate environment

Testing Hard-to-Access Detectors

"For remotely situated or hard-to-access detection equipment, consideration needs to be given to the feasibility of testing and maintenance at the design stage."

BS:5839-1: 2017 Clause 22.1

What this means
- Detectors should be tested – regardless of position
- The test method should be approved by detector manufacturers

TEST REPORT SHARE

If you're looking to take your testing to the next level, you need a solution engineered for maximum productivity, as well as meeting the growing demand for proof of testing.

It's time to outfit your team with a connected test solution that not only delivers on smoke and heat testing, but auto generates a digital test report proving the status of each detector – providing valuable insight and boosting productivity.

During testing, Testifire XTR2 senses the detector LED to confirm the test result – automating the recording of results and pushing the data into a digital report.

◄► **All-in-one smoke and heat testing including: Smoke, Heat, Hi-Heat, Combined, Sequential & Delayed Start test modes**

◄► **Rapid smoke generation and built in clearing mode to eliminate repeat alarms**

◄► **App connectivity for test job creation, reporting and added functionality**

◄► **Up to 50% faster heat testing compared to the previous generation of Testifire**

testifire® XTR2 | DT CONNECT

Testifire XTR2 alongside DT Connect equips you with advanced features to streamline your testing process, easily manage site assets and optimise your reporting capability.

▶ **Job Creation**

▶ **Log addressable panel time to synchronise test and panel event timestamps ***

▶ **Test result capture**

▶ **Asset Identification ***

▶ **Panel Reconciliation ***

▶ **Job Summary**

▶ **Shareable Reports ***

* Premium DT Connect Features
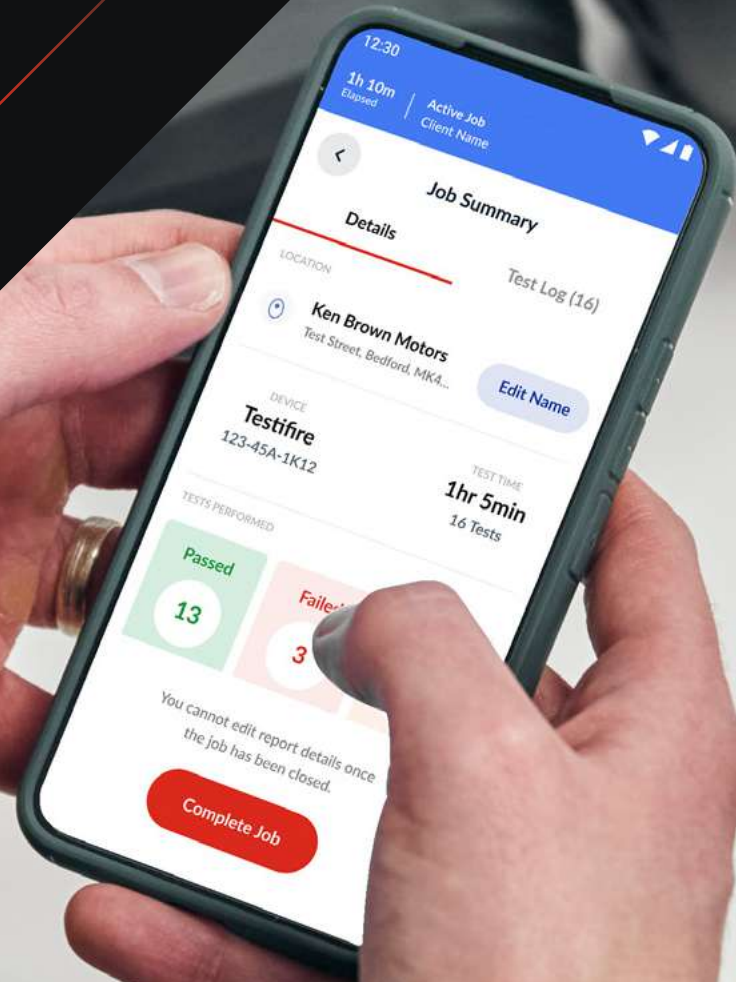

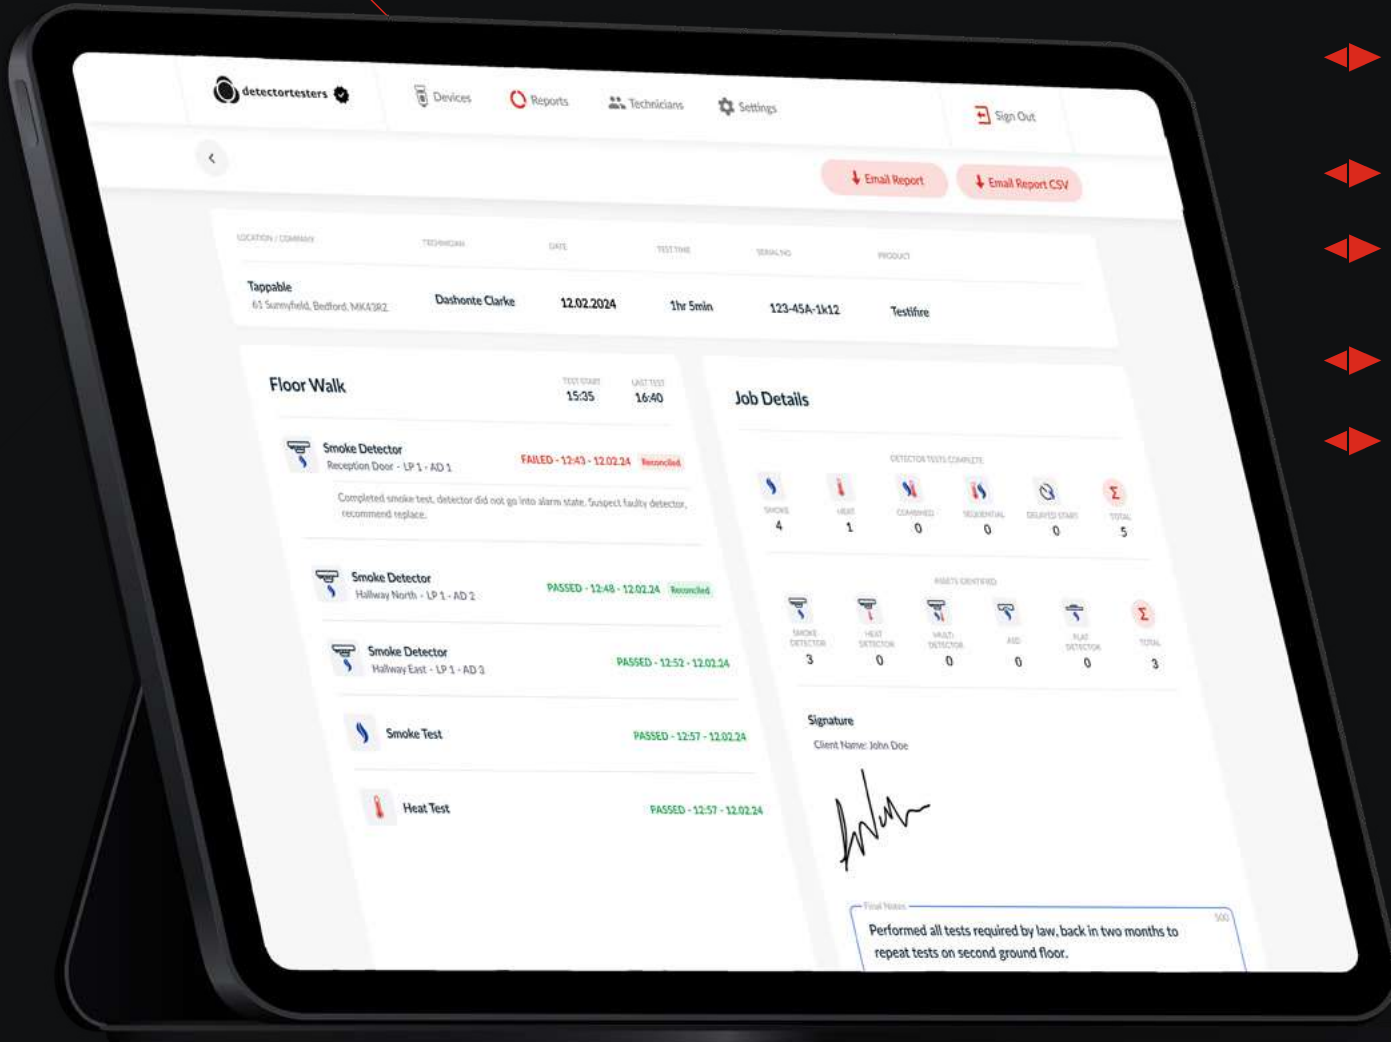

The Cloud Portal gives an instant overview of work carried out, making it easy to share test reports with clients

Review and manage reports from all test jobs

Share reports with clients (PDF or CSV) *

Manage engineer accounts and Testifire XTR2 registrations

> ANY DETECTOR
> ANY TIME

Testifire is the world's leading all-in-one tester. One tool for testing smoke, heat and CO allows testing of any detector regardless of type.

As an all-in-one tester, Testifire not only delivers on convenience - it is also the leading solution for compliant testing of multi-sensor detectors, which are becoming more and more widespread.

Testifire offers a built-in clearing mode to eliminate repeat alarms and its high heat setting allows for testing of heat sensors up to 100°C.

YOUR TESTIFIRE SOLUTIONS

Step 1 | Do you mainly test smoke and heat, or do you test smoke, heat & CO?

Choosing the right Testifire solution for you couldn't be easier.

100°C Heat

TESTIFIRE SMOKE / HEAT TEST KIT

TESTIFIRE 1001-001

Testifire 1000 is not available in all regions, please contact us for more information

Includes:

1x Testifire 1000-001 Head Unit (Smoke & Heat)
1x TS3-001 Smoke Capsule
1x Solo 727-001 Fast Charger
2x Solo 770-001 Battery Baton

100°C Heat

TESTIFIRE SMOKE / HEAT / CO TEST KIT

TESTIFIRE 2001-001

Includes:
1x Testifire 2000-001 Head Unit (Smoke, Heat & CO)
1x TS3-001 Smoke Capsule
1x TC3-001 CO Capsule
1x Solo 727-001 Fast Charger
2x Solo 770-001 Battery Baton

Accessories

Testifire uses non-hazardous, non-pressurised, environmentally -friendly capsules to generate smoke and CO.

To make sure you do not run out of capsules, the following capsule replacement packs are available:

Smoke Capsules	
Replacement Smoke Capsule	**TS3-6PACK-001**

Carry Bag	
Protective Storage & Pole Bag	**SOLO 610-001**

URBAN KITS

For engineers on the go

When the poles need to be compact and easy to carry – for example, when you are travelling on public transport or are carrying all your test equipment on foot, then the Solo Urban Kits are your ideal choice.

Not only are the poles compact enough to fit on a backpack, the backpack will also keep your Testifire protected too.

With this kit you will be able to access and test detectors at heights of up to 5 metres.

Collapsed length: 60cm

INDUSTRY LEADING TEST EQUIPMENT

For over 25 years, Solo has been the industry's most popular range of detector test equipment. Used and approved worldwide, the comprehensive Solo range allows you to choose the right solution for your needs.

Solo 365 is the latest addition to the Solo range. Similar to Testifire, Solo 365 uses non-hazardous, non-pressurised, environmentally-friendly cartridges to generate smoke. Smoke testing has never been this easy.

A proximity sensor allows automatic generation of smoke as the detector enters the cup. Repeat alarms are all but eliminated with the clearing mode – with remaining smoke cleared away from the detector after testing.

YOUR SOLO SOLUTIONS

Step 1

What do you need, a smoke tester, or a heat tester?

SOLO 365 SMOKE TEST KIT

SOLO 365-001

Includes

1x Solo 365-001 Smoke Detector Tester
1x Solo ES3-001 Smoke Cartridge
1x Solo 371-001 Smoke Generator
1x Solo 370-001 Li-ion Battery Pack
1x USB Universal Charger

Smoke Cartridge

ES3-12PACK-001

SOLO 365 ASD ADAPTOR

SOLO 372-001

If you are testing ASD systems, the Solo372-001 is the accessory for you. It is an adapter for your Solo 365 that's easily fitted to allow functional testing of ASD systems.

DISPENSERS & AEROSOLS

The most widely used system for the last 20 years. The dispenser works with Solo A5, Solo A10s and Solo A10 smoke detector test aerosols.

Used with Solo C3, it also delivers fast and effective functional testing of CO detectors.

Available in two sizes:

SOLO 330 AEROSOL DISPENSER

SOLO 330-001

SUITS DETECTORS UP TO 100 MM / 4" DIAMETER

SOLO 332 AEROSOL DISPENSER

SOLO 332-001

SUITS DETECTORS UP TO 177 MM / 7" DIAMETER

The Solo 332 is ideal for detectors with a larger diameter thanks to its increased cup size.

![smokesabre™ SMOKE DETECTOR TESTER]

SMOKESABRE HAND-HELD AEROSOL

SMOKESABRE-01-001

The ultimate hand-held smoke detector tester.

The built in 'Sabre' makes the product unique compared to other hand-held smoke test sprays - preventing use too close to the detector, that could lead to damage and nuisance alarms.

SmokeSabre is the ideal back-up for your complete test and maintenance kit or perfect as a test solution for small jobs or infrequent testing.

150 ML Supplied in boxes of 12

Alternative size	
100ml	**Smokesabre-100-001**

PERFECT FOR SMALLER JOBS

TESTING HARD-TO-ACCESS SMOKE DETECTORS?

Scorpion is the solution for buildings with hard-to-access detectors. Suitable for both Point and Aspirating Smoke Detection (ASD) systems, Scorpion ensures all smoke detectors can be tested – regardless of location.

Detectors in hard-to-access locations still need to be tested, and this can take not only additional time, but incur additional costs and personnel downtime. Scorpion suits a wide range of applications.

SOLUTIONS FOR TESTING POINT & ASD SYSTEMS

SCORPION POINT SMOKE DETECTOR TESTER

SCORP 1011-001

The Scorpion head unit is permanently installed alongside the smoke detector.

Includes
1 x Scorp 1001-001 Point Head Unit & Mounting Bracket
1 x Scorp 25-001 Access Point

SCORPION ASD SYSTEM TESTER

SCORP 2011-001

The Scorpion head unit is permanently mounted adjacent to a sampling point on an ASD system pipe – typically at the end of the run. Just one head unit is required for each pipe run – regardless of the number of sampling points.

Includes
1 x Scorp 2001-001 ASD Head Unit & Mounting Bracket
1 x Scorp 25-001 Access Point

ENGINEERS PORTABLE CONTROLLER

SCORP 7000-001

Portable controller connects to a Scorpion Access Point to enable smoke generation and testing.

Powered via a Solo 770 Battery Baton.*

*Available separately

MULTI-STIMULUS DETECTOR TESTER

On-site with Testifire & Choice Fire & Security

We joined David and the team from Choice Fire & Security on site at Dolphin Square in Pimlico, London to witness their use of Testifire as part of a large project installing Hochiki multi-sensor detectors.

The 13 month project, which has recently been completed, involved installing a multi-sensor detector in each of the site's 1064 luxury apartments.

This scale of task required careful planning and management, with Testifire playing a crucial role during commissioning – ensuring that the detectors were working as they should – ready to protect the residents and the luxury surroundings.

"SMOKE & HEAT ON THE SAME TOOL MAKES IT EASIER AND QUICKER FOR TESTING"

Dave King - Choice Fire & Security

scorpion
REMOTE DETECTOR TEST TECHNOLOGY

University of Southampton - Lift Shaft & Void Install

We joined Detect Fire and Security engineers to have a look at a few of their buildings. The first was the Estates Department which housed a lift shaft with a point detector installed.

Testing of this detector not only required the presence of a fire engineer but also a lift engineer and facilities staff from the university. As well as adding additional cost to the testing – this also took a significant amount of time and effort to arrange.

On the day of the testing, the lift had to be put out of action, causing disruption to the running of department. In addition to normal safety practice, a member of staff was required to label each lift button over the five floors of the building to promote the lift being out of use.

The second building, a Chemistry Department, housed a number of lecture theatres and high hallways. These contained a concealed ASD system which spanned across a secure area. The pipes path, linking the ASD panel to the fire panel, had a security door in-between – meaning it required significant time and effort to access the area and carry out testing.

As the contracted fire and safety maintainer, Detect Fire and Security, typically tested the university's detectors using Testifire. However, those in hard-to-access locations, such as those identified above required a different approach and it was here that they considered Scorpion.

The justification for installing Scorpion saw the installers and building manager analyse the cost of installation against the cost of accessing the detector by other means. They considered cost areas such as access equipment and additional personnel and also looked at the amount of time it would take to organise. In many cases it was very easy to justify installing Scorpion. In the case of the lift shaft, the lifecycle of Scorpion means that once installed in will be capable of 240 tests of 15 seconds. Which should be long enough to outlast the life of the detector itself.

With everyone on site, the installation of Scorpion in the lift shaft and the ceiling void was quick and simple.

Future tests of these detectors can now be easily achieved from ground level – crucially at the same time as all the other detectors and without the need for additional personnel and planning time.
> *"SCORPION WILL SAVE TIME & MONEY AND ELIMINATE THE DISRUPTION NORMALLY CAUSED BY TESTING THESE DETECTORS"*

Rob - Detect Fire & Security Engineer

SPARES

A range of spares are available for each
of our product ranges.

HISTORY TIMELINE

Detectortesters

NO CLIMB☑

Name Changed to 'No Climb Products'

With products now focusing on fire detector testing, the business name changed simply to 'No Climb Products'.

Trutest

Trutest Comissioned

The first sight of the Trutest range, designed to measure sensitivity of smoke detectors.

SDi
Specialized Fire Products

Joint Venture in the USA

With high demand for products coming from the USA, a joint venture was entered into – the creation of SDi – developing sales for both Solo and Trutest.

Moved to Alston Works, Barnet

Increased products and manufacturing processes led to the need for bigger premises and a move to Barnet.

No Climb Lamp Changers Name Introduced

A growing need for lamp changing equipment led to a new brand being introduced

First European Exports Sales

Demand for the range of detector test equipment continued to grow – including from further afield with the first orders arriving from overseas.

UL Trutest UL Listed

The company's first UL certification arrived in 1999, supporting the growth of the product in the USA.

Solo

A car test o added range the cr Solo 0 know

1965	1968	1980	1986	1987	1989	1990	1994	1995	1999	2000	2001	2002

Company Founded

Company originally founded as 'Cable Strippers'

System 6 Tester Range Launched

The company's first range of fire detector test equipment was launched under the 'System 6' brand name.

SOLD Purchased by New Owners

A change in ownership, when the Rossiter family purchased the business.

BFPSA
British Fire Protection Systems Association

Joined the British Fire Protection Systems Association

Further highlighting commitment to the fire industry, the company became members of the leading UK fire trade association.

SOLO

Solo Brand Launched

The launch of the famous Solo range, now the industry's most popular test solution for functional testing.

SOLO

Solo 460 Launched

With increasing demand for heat detector testers, a patented cordless test solution was launched in the form of the Solo 460.

SOLO

Solo A3 Launched

Further development of the Solo range saw the launch of the Solo smoke aerosol.

Re-branded as Detectortesters

We re-branded and introduced new logos for all our products, bringing them all together under the umbrella of 'detectortesters'.

Scorpion Brand Launched

Another new product, this time a solution for hard-to -access detectors and aspirating smoke detection systems.

Urban Kits Range Launched

The launch of compact fire detector test kits that support easy movement around cities, large sites and buildings.

Awarded Queen's Award for Enterprise: International Trade

A huge honour arrived in 2003 with the company's international trading being acknowledged with a Queen's Award for Enterprise.

Smokesabre Brand Launched

launched as the ultimate hand-held smoke detector tester. A unique design of tester which keeps detectors safe from contamination.

Awarded Queen's Award for Enterprise: International Trade

The award recognised 6 years continuous strong export growth.

C3 Launched

bon monoxide offering was d to the Solo e in 2002 with reation of the CO aerosol – wn as Solo C3.

ISO 9001 Accreditation

Member of newly formed FIA

Awarded Queen's Award for Enterprise: Innovation (Testifire)

A second Queen's Award for Enterprise. This time for the innovation shown in our Testifire product.

New Solo Aerosol Range Launched - Solo A5 & A10

Entered Sunday Times Export Track 100

2003 — **2004** — **2007** — **2008** — **2009** — **2013** — **2014** — **2015** — **2017** — **2019** — **2020** — **2021**

Testifire UL Classified

Smokesabre UL Listed

Solo 365 UL Classified

Smokesabre 100ml Launched

The industry's most innovative hand-held smoke aerosol was made available in a smaller, handy sized 100ml can.

Moved to Edison House, Welham Green

Further growth led to a move to a new premises in Welham Green, offering increased production, warehouse and office space.

Patron of the Prince's Trust

A proud moment for the company as we became a Patron of the Prince's Trust.

Prince's Trust

Solo 365 Launched

The next generation of Solo arrives in the form of a cartridge based smoke detector tester.

Testifire Brand Launched

A major new product in the form of Testifire. The world's first all-in-one tester for testing smoke, heat and CO.

Solo A3 & Solo 330 UL Listed

UL certification for Solo A3 and Solo 330 was achieved, providing further support to the uptake of the product in the USA and beyond.

20 Years of Testing

Our Solo range celebrated its 20th year, during which time it became renowned as the industry standard for testing.
