WIREPATH
BULK WIRE

## WP-CAT78-RJ45-SHLD Shielded Keystone
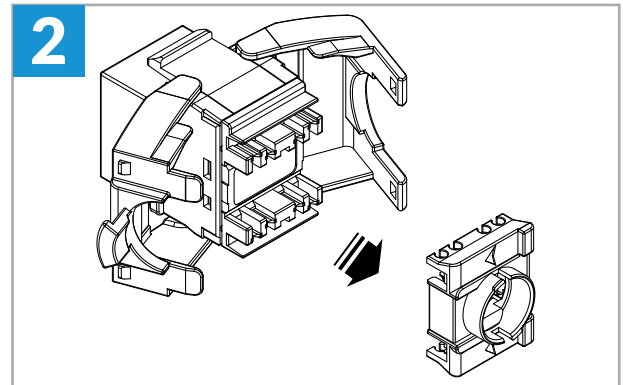

Tools Needed:
- Wire Cutters
- Flathead screwdriver
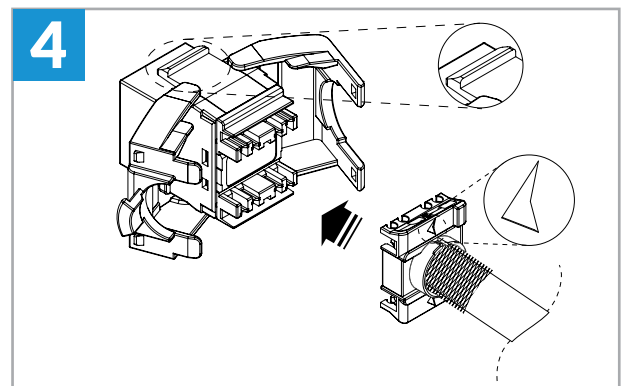

Installation

1

30mm

15mm

Remove 30mm of the cable jacket. Untwist and straighten the wires. Keep 15mm of the braid foil.
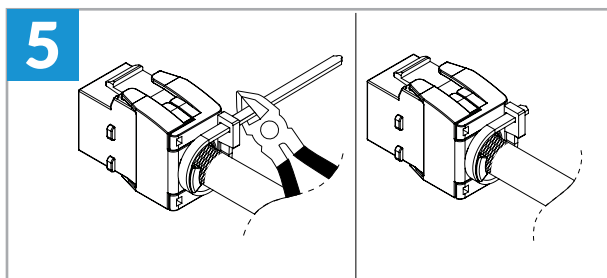

2

Open the clamps and remove the cap.

3

Thread the cable through the cap. Seat each color of wire into its matching cap position. Trim excess wire.
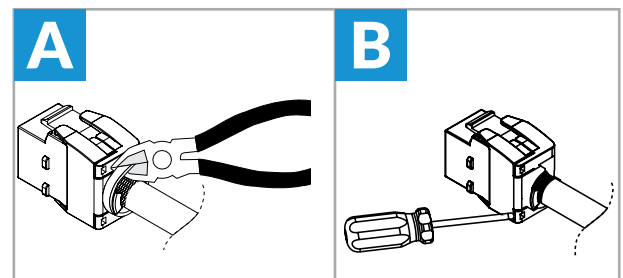

4

Check that the wired cap is aligned properly. Insert it into the keystopne and close the clamps.

5

Wrap the supplied cable tie around the wired cap as shown, then tighten it. Trim the cable tie.

Removal

A

Cut the cable tie.

B

Insert a flathead screwdriver to unlock the clamps and remove.
