HUBBELL

Hubbell Wiring Device-Kellems and Hubbell Premise Wiring are divisions of Hubbell Incorporated, a U.S. headquartered manufacturer with over 130 years of supplying solutions for the electrical and data markets. Hubbell's strength is demonstrated by a long-standing reputation for supplying reliable electrical and cabling support products.

Our highly trained sales force and distribution network have earned global recognition in the structured cabling industry. With offices in many countries and a worldwide distribution network, Hubbell makes customer satisfaction our highest priority.

HERE TO HELP

Working with schematics and blueprints can be a very time-consuming and costly part of doing business. Many contractors employ full-time staff to count components when planning jobs and providing estimates. This task can be handled much more efficiently using Hubbell's take off services. Hubbell Take Off Support provides the contractor, engineer, end user a completed BOM, including all related products, counts, symbol legends and information required to price a project. Don't spend the many hours required to do counts and create BOMs for projects, rely on Hubbell's take off services to do it for you.

BIM

Hundreds of BIM models available to assist with data center design:

- Cabling infrastructure products
- Cable management
- Power
- Grounding
- BIM models
- CAD drawings
- CSI specification text

Steel Ladder System

Hubbell's NEXTFRAME[®] Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings.

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable. Rail and stringer material is 16 ga steel tubing.

The NEXTFRAME[®] Ladder Tray is available in popular gray and black finishes to complement equipment in any data center. The complete NEXTFRAME[®] Ladder Tray system features a broad line of sizes and fittings required for proper installation.

FEATURES

- Supports horizontal/vertical and overhead cable management
- Durable black or gray powder coat finish
- Supports UTP or fiber cabling
- Complete family of accessories includes: wall supports and brackets, cable drops, retaining posts, splice kits, and ceiling mounting kits

SPECIFICATIONS

- Material: 16 ga. tubular steel
- Durable powder coat
- Stringer dimensions: 0.375"W x 1.5"H
- Rung spacing: 9.0"
- Weight capacity: 45 lbs./foot

APPLICATIONS

Use in data centers, the equipment room, and telecommunications room to provide racking, cable management, and grounding for network hardware.

Modular System: Easily Configured for New and Existing Cable Routing.

Mounts to: Floors, Walls, Ceilings, Equipment Racks, and Cabinets.

Tip: Secure Ladder to Cabinet Tops Using J-bolt Kit and Drilling Holes as Required.

Aluminum Ladder System

SPAN/LOAD CLASS DESIGNATIONS

Commonly called the Load Class, this defines the load-carrying capability of the tray for a specific support span distance. The design and cost of the cable tray is greatly affected by this designation. In order to determine the most appropriate and economical system, a class should be selected that reflects the actual total working load and support span for each application.

CONCENTRATED STATIC LOADS:

Some applications may require the cable tray to support the weight of a single, dead object in addition to the cable loads. Specifications typically require this to be applied at the midpoint of the span between the tray supports, which is the worst-case location.

To incorporate this in the tray design the following formula can be used to convert the concentrated static load in pounds to an equivalent uniform load (W_e) in pounds per foot. That equivalent load can then be combined with the weight of cables, tray contents, and other loads that are also expressed in lbs/ft to determine the total Working Load.

$$W_e = \frac{2 \times (\text{Concentrated static load, lbs})}{\text{support span length, ft}}$$

Note: This calculation is based on the load being applied at the center of the tray in the middle of a rung or bottom. If the specification requires the concentrated static load to be applied on top of one side rail, then the equivalent uniform load will be 2 times the result of this calculation.

Example: A cable tray is to be supported on 20' spans. It shall contain 50 lbs/ft of cables and support 15 lbs/ft of snow load. It is also required to support a 250 pound concentrated static load applied in the center of the tray width.

Using the calculation above, the concentrated static load is converted to an equivalent uniform load as follows: 2 x 250 lbs / 20 ft = 25 lbs/ft

The Total Working Load will be the combination of all 3 loads, expressed in lbs/ft:

Cables	40 lbs
Snow	+ 15 lbs/ft
Concentrated Load	+25 lbs/ft
Total Working Load: 80lbs/ft	

Refer to the chart on the right. With a support span of 20' and a total working load of 80 lbs/ft, a NEMA Class 20B tray rated at 75 lbs/ft will not be adequate. A NEMA Class 20C tray, rated at 100 lbs/ft, will be required.

Material: All fittings are aluminum with arc-welded construction.

Side Rails: Fitting side rails are I-beams with overall dimensions similar to straight tray sections.

Rungs and Bottoms: Rung and Bottom designs are identical to similar straight cable tray sections.

Tangents: All fittings have 3" tangents (flats) at the end of all curved side rails to accommodate splice plate connectors.

Radius: Standard NEMA VE1 12", 24" and 36" available for all curved fittings.

Square Corners: 90 Degree Horizontal Elbows, Horizontal Tees and Horizontal Crosses are available with square corners (0" Radius). The 6" through 18" square-corner fittings are designed to align with the centerline of 24" square panels of raised-floor systems

Splice Plates: All elbows are supplied with one pair of standard splice plates with hardware at no charge. Wye fittings and tees include 2 pairs and crosses include 3 pairs with hardware at no charge.

Span/Load Class Designations

Per NEMA Standard VE1/CSA C22.2 No.126

Working Load LBS/FT (Kg/M)	Support Span, Feet (Meters)					
	5 Ft (1.5 M)	8 Ft (2.4 M)	10 Ft (3.0 M)	12 Ft (3.6 M)	16 Ft (4.9 M)	20 Ft (6.0 M)
25 (37)	5AA	8AA	10AA	12AA		20AA
45 (67)						D
50 (74)	5A	8A		12A	16A	20A
65 (97)			C			
75 (112)		8B		12B	16B	E* or 20B
100 (149)		8C		12C	16C	20C
120 (179)			D			
200 (299)			E			

* CSA Classes D and E are applicable to both 3.0 and 6.0 meter support spans. The appropriate support span should also be included when specifying these classes (example: D-3M).

WORKING LOAD

The total load supported by the cable tray, uniformly distributed. This will be the combined weight of all of the cables or tray contents, any environmental loads (snow, ice, dust) and any concentrated static loads.

SUPPORT SPAN

The maximum distance between the tray supports.

NEMA LOAD CLASSES

A number (support span in feet) combined with a letter (load capacity:A=50, B=75 and C=100 Lbs/Ft). Defined in the National Electrical Manufacturers Assoc. NEMA Standard VE1.

CSA LOAD CLASSES

A single letter (A,B,C,D,E) designates the support span and load capacity per Canadian Standards Association CSA Standard C22.2, No. 126.

All Hubbell aluminum cable trays are classified by Underwriters Laboratories as suitable for use as equipment grounding conductors per NEC 392 and are certified by UL to meet all requirements of CSA Std. C22.2 No. 126. All NEMA and CSA safe load data is based on destruction load tests that were witnessed and certified to be accurate by Underwriters Laboratories.

CABLE TRAY CROSS-SECTION

- Extruded aluminum alloy 6063-T6
- Side rails are I-Beam profiles
- Rungs are 1-1/8" square tubes with open slot facing down
- Arc-welded construction
- U.L. Classified grounding
- U.L. Certified load capacities NEMA, CSA and NEC Compliant
- Necessary Splice Plates with hardware are included with all straight sections and fittings
- Made in the USA
- Available in 6", 9", 12", 18", 24", 30" and 36" Widths

Wire Basket System

SUPPORT BROAD RANGE OF APPLICATIONS

Hubbell Wiring Systems offers a comprehensive Wire Basket Tray System to handle every application. From pre-galvanized solutions for commercial controlled interior environments to stainless steel versions for industrial applications such as food processing, marine and highly corrosive environments. Hubbell also features labor savings options including No-Splice supports which also reduce material cost, and Pre-Formed fittings which offer tremendous productivity enhancement to the installer by eliminating field cuts that are required when fittings are formed in the field. Hubbell also offers painted trays in virtually any color needed. The painted tray is masked to reduce on-site paint removal saving time and money. Hubbell Wire Basket Systems are available in overhead and raised floor designs. Complete shipments, job site location palletization and markings, and product customization make Hubbell the choice for every wire basket tray installation.

CUSTOMER SUPPORT AND TECHNICAL ASSISTANCE

Hubbell's knowledgeable sales team is just a call away for assistance in selecting the proper type basket tray for any application or providing design assistance including developing a bill of material.

PRE-GALVANIZED FINISH IS ENVIRONMENTALLY FRIENDLY

The standard finish for Hubbell Basket Tray is pregalvanized which is a significantly more environment friendly manufacturing process as compared to galvanizing dip. Pre-galvanizing applies a zinc galvanization to the wire PRIOR to fabrication. The galvanized wire then welded and formed into the appropriate basket tray size. Hubbell's pre-galvanized finish performs the same as the post-zinc plated production finish while avoiding secondary chemical processing. A less eco friendly post-fabrication electro-zinc finish is also available for those who require it.

SUSTAINABLE APPROACH

Hubbell utilizes a sustainable approach to assist in maintaining the environment. Our wire basket systems utilize 100% recycled steel content in the manufacturing of our tray, and are packaged in kraft unbleached packaging. Packaging and strapping materials are recyclable. MillCerts are available upon request to assist in documenting recycled content for possible LEED credits.

"Round" Wire Design

WIRE BASKET TRAYS

ROUND WIRE

Round Cross-Wire Design

Features

- T-weld construction prevents snags
- 5mm round wire minimum
- High load rating
- Easy to cut and fabricate fittings in the field
- 100% recycled steel
- 2" x 4" mesh opening

- Use factory support hardware or fabricate supports at the job site
- Painted tray includes factory installed masking to ensure proper grounding at splices; no need to remove paint during installation

ELECTROPLATED ZINC

Round Cross-Wire Design

Features

- T-weld construction prevents snags
- 5mm round wire minimum
- High load rating
- Easy to cut and fabricate fittings in the field
- 2" x 4" mesh opening

- Use factory support hardware or fabricate supports at the job site
- Electroplated zinc galvanized (post plated) made from carbon steel and plated to ASTM B 633, Type III, SC-1

STAINLESS STEEL

Round Cross-Wire Design

Features

- Type 304L and 316S stainless steel
- Meets ASTM A580 specifications
- 4.5mm round wire minimum
- Stainless splice kits and ceiling supports are available

Applications

- Food processing
- Wash down areas
- Corrosive environments
- Outdoor installations
- Marine

Field Configurable Fittings

90° Sweep Elbow
Use appropriate quantity of splice Kits

Tee Fitting
Use one HBTCS corner splice per each

Supports and Hardware

Ordering Information
See page 12

FEATURES

- T-weld construction prevents snags
- High load rating
- Easy to cut and fabricate fittings in the field
- 2" x 4" mesh opening
- Use factory support hardware or fabricate supports at the job site
- Painted tray includes factory installed masking to ensure proper grounding at splices; no need to remove paint during installation

• UL Classified/cUL Classified as equipment ground conductor.
 Note: All dimensions are +/- 0.25". Custom paint colors available in addition to Black Powder Coat (Contact Hubbell).
 See page 14 for wire fill and maximum load chart.
 *See page 13 for details.

Wire Basket System

FEATURES

- Flat shaped cross-wires provide significantly more surface area to support weight of cables
- Flat ribs provide 400% more surface area and reduce stress on cables by 60%
- 100% recycled steel
- 2" x 4" mesh opening
- Reduction in stress helps maintain Cat 6 and Cat 6A performance
- Cuts and configures the same as round wire tray
- Uses the same splicing and mounting hardware as round wire tray

 See page 14 for wire fill and maximum load chart.

INSTALLATION EFFICIENCY

Hubbell pre-formed fittings are time and cost effective solutions to installing 90 degree radius, Tees and Intersections, no cutting and no configuring. Hubbell offers Pre-galvanized or Black powder painted finishes. The fittings simply attach at the Intersections Tees or junctions when you want a radius bend. The fittings are manufactured precisely to the basket tray being utilized providing a clean engineered solution.

Installation of Hubbell pre-formed fittings can reduce installation configurations from hours to a few minutes. Labor and time savings can exceed 90% plus versus traditional cutting and splicing. Pre-formed fittings ensure a consistent installation every time and also avoids the sharp wire edges caused during the cutting process. Standard Hubbell pre-formed fittings consist of a pregalvanized base with black polymer sides and splicing hardware.

1. Splicing hardware included

2. Attach first tray with washer support and 1/4"-20 nut and bolt

3. Washer support secured to tray

4. Attach second tray

5. Install is complete

Accessories

Description	Tray Width	Finish	Catalog Number
Radius Down Increases cable protection and cable bend control; <i>1 per box</i>	4" (102) 6" (152) 12" (305)	Black Black Black	HBTRD4BK HBTRD6BK HBTRD12BK 
Vertical Down Protects cables when dropping from the end or side of tray; <i>1 per box</i>	7¾" (102)	Zinc Plated Black	HBTVD HBTVDBK 
Label Clip Attachment for all sizes of tray; <i>1 per box</i>		White	HBTLCL 
Cable Guide Maintains cable bend radius and acts as a divider for straight sections and fittings; <i>1 per box</i>		Black	HBTCG 
Electrical Box Bracket Attaches electrical box to side of tray; <i>1 per box</i>		Pre-Galvanized Black	HBTEB HBTEBBL 
Sidocar Attaches to outside of tray, provides additional cable support 2" deep; <i>1 per box</i>		Pre-Galvanized Black	HBTSC HBTSCBK 
Splice Kit 3 piece staked bolt/washer and nut combination; splices straight sections and field formed fittings; <i>50 pieces per box</i>		Zinc Plated Black Stainless Steel	HBTSK HBTSKBK HBTSKSS 
Bar Splice Slotted bar 11 ⁵ / ₁₆ " long; Splices straight sections and fittings; bend to form tray reducers; adds rigidity to tray splices; <i>50 pieces per box</i>		Zinc Plated Black Stainless Steel	HBTBS HBTBSBK HBTBSSS 
Corner Splice (2) 90° splice bars and (8) sets of the splice kit Splices Fittings Use one per each Tee Fitting; <i>Use two per each Cross Fitting</i>		Zinc Plated Black Stainless Steel	HBTCS HBTCSBK HBTCSSS 
Washer Supports Splices straight sections and fittings and can also be used as a hold down method for tray to strut (Nut and bolt provided separately); <i>50 pieces per box</i>		Zinc Plated Black Stainless Steel	HBTWS HBTWSBK HBTWSSS 
Self Tapping Screws ¼" - 20 self tapping screw and HBTWS; <i>50 pieces per box</i>		Zinc Plated	HBTUGS 

Accessories

Description	Finish	Catalog Number
Fitting Attachment Fills the gap in tray when creating fittings in 2" tray or 4"/6" tray	Pre-Galvanized Black	HBTF2 HBTF2BK HBTF46 HBTF46BK 
Rack Attachment Attaches tray directly to the top of a standard rack	Zinc Plated Black	HBTRA HBTRABK 
Conduit Attachment Connects conduit to tray (¾", 1" and 1¼" conduit)	Pre-Galvanized Black	HBTCA3 HBTCA3BK 
Nut and Bolt Sets ¼" - 20 nut and bolt sets; <i>50 per box</i>	Zinc Plated Stainless Steel	HBTNB HBTNBSS 
Cable Drop Outs Black polymer inserts; Installed into the bottom of the basket tray to reduce pinch points and maintain a radius bend on the exiting cables	Black	HBTCDBK 
Strut Clips Used to hold down the basket tray when used with any standard industry strut supports; <i>50 per box</i>	Pre-Galvanized	HBTSTRUTCLIP  <ul style="list-style-type: none"> • 12" trays or smaller use 2 clips per strut support • 16" - 18" trays use 3 clips per strut support • Larger trays add one clip per strut support for every 6" of tray width
Split bolt for bonding/grounding tray, 50pk	Copper	HBTSB50
Double Splice, 50pk	PreGalv Black White	HBTSKD HBTSKDBK HBTSKDWHT <ul style="list-style-type: none"> • For use with trays 4" - 8" height • Use 2 splices for tray 2"-12" width • Use 3 splices for tray 14"-24" width
Corner Radius, 2 radius splices with hardware	PreGalv Black	HBTCRS HBTCRSBK

Cutting Tool

Description	Weight (Lb/each)	Qty. per Box	Catalog Number
Manual offset angled cutting tool, 24" leveraged handle	6.0	1	HBTCUTTOOL

Under Floor Accessories

Description	Finish	Catalog Number	
Kit, Pedestal (2) HBTUPC and (1) Cross bar	Pre-Galvanized	HBTUPK	
C-Bracket 6" Tier 12" Tier	Pre-Galvanized Pre-Galvanized	HBTUCB6 HBTUCB12	
U-Clamp, Pedestal (1) Clamp	Pre-Galvanized	HBTUPC	
Tray Grounding Fasteners Washer supports HBTWS and 1/4" - 20 self threading screws; 50 per box	Zinc Plated	HBTUGS	
Intersection Supports For use with HBTUSUPP series support	Pre-Galvanized	HBTUFIT	
Vertical Up	Pre-Galvanized	HBTUVU	

Note: See page 16 for L-brackets and C-brackets.

Supports 22" Pre-Galvanized

Hubbell Delivery Systems

Delivery eTour

This interactive, virtual tour of a city takes visitors through various commercial settings. As users navigate through the virtual city, the eTour demonstrates where and how Hubbell Delivery Systems products can be deployed in the floor, through the floor, on the wall, on the surface and from floor to ceiling and demonstrates solutions in these spaces.

Visit our website to take the tour.
