

# GLOW RODS

## 6' LENGTH

ADI PRO's 6-foot glow rods are used to push and pull wire and cable in low-light environments. These flexible, strong fiberglass rods are splinter-free and include durable brass connectors and ends. Three models are available, featuring male to female or bullnose to female connectors, or pulling eye ends.

## FEATURES

Luminescent green fiberglass offers high visibility

Slow curing process for strong, flexible and splinter-free fiberglass

Durable brass connectors allow for easy extension of rods or disassembly for transportation

Glow rod pull strength 500 lbs. (227kg); assembly pull strength (with connectors) 176 lbs. (80kg)

Standard 3/16" diameter

Bullnose connector provides extra strength (0E-GRBULF6)

Limited Lifetime Warranty
