

More stimulus-compliant products
from us, more opportunities for you.

 **legrand**[®]

Pass & Seymour

Meet the demands of even the most challenging stimulus-funded projects.

As government stimulus spending continues to drive new construction, opportunities abound for electrical contractors. But, in order to take advantage of those stimulus dollars, everything you install must meet the stipulations set forth in the

Buy American provision of the American Reconstruction and Reinvestment Act (ARRA).*

That's why it's important to have a partner like Legrand/Pass & Seymour. We offer the most comprehensive line of stimulus-compliant wiring products in the industry, with everything from our P&S PlugTail™ devices to lighting controls, switches, receptacles and screwless wall plates manufactured right here in North America. In addition, we also offer a full line of products manufactured in free trade agreement member countries. That means, whatever the project, and whatever the application, Legrand/Pass & Seymour can help you reap the rewards of stimulus-funded public works opportunities.

* Section 1605 of the American Reconstruction and Reinvestment Act (ARRA), also known as the Buy American provision, requires that certain materials used in projects funded by the Act be manufactured in the US or in specific foreign countries signatory to the Free Trade Agreement (FTA) and the World Trade Organization (WTO) Agreement.

**Legrand/Pass & Seymour
provides a stimulus-compliant
solution for all your
electrical device needs.**

All specification-grade receptacles and switches, along with our full line of plugs, connectors, Flexcor® products and wall plates, are manufactured in stimulus-compliant countries. The part numbers shown represent products that may have more than one country of origin. We offer a non-NA part # for receptacles, switches, plugs and connectors, and wall plates that meet NAFTA standards — for more information, visit legrand.us/passandseymour.
