

Performance for the Real World

Episode IP 70V Amplifier

The Episode IP 70V amplifier is the perfect combination of brains and brawn. This powerful amp provides premier sound for you and powerful remote management features for your integrator to make your system work smarter.

ESA-70V2CH-150W

ESA-70V2CH-300W

ESA-70V2CH-500W

Easy Configuration

We've equipped this amp with sophisticated system-management capabilities, which allows your integrator to remotely update firmware, power-cycle the unit, check the status of your device, and more – so you can focus on your business.

Simple System Control

If your space is equipped with a control system, you can easily power your amp, control volume, and select sources with the push of a button.

Safe Operation

This amp comes equipped with high surge level protection components, and was battle tested in the harshest environments to ensure your system stays up and running.
