2" CENTRAL VAC TUBING
RIGID POLYVINYL CHLORIDE, WHITE

ADI PRO's certified Central Vacuum Tubing for central-vacuum cleaning systems is used to convey debris from the vacuum inlets to the central-vacuum power units. All ADI PRO tubing is nationally certified by IAPMO, verifying that the tubing meets and/or exceeds all updated ASTM F-2158 Standards. This guarantees the tubing will mate with industry approved fittings, allowing for seamless residential or industrial installation.

FEATURES

- **Compatible with all industry approved fittings**
- **All tubing will be legibly marked with the Uniform Mechanical Code (UMC) shield**
- **Tubing is white in color to match industry approved fittings**
- **Material is designed and certified to cut clean when using recommended tubing cutter for smooth installation**
- **ASTM F-2158 certified by third party governing body IAPMO R&T recognized laboratories**
