## PROJECTION SCREEN

Get premium viewing performance and smooth operation with the Dragonfly™ Motorized Projection Screen. It's there when you want it and gone when you don't, thanks to an efficient motor and easy control options. Designed to work effortlessly with most lighting conditions, this versatile screen creates the ideal home theater experience. It's crafted with top-of-the-line materials and a whisper-quiet motor, combining impressive high-definition performance with an elegant look and feel.

### Ideal Picture Quality

Dragonfly™ Projection Screens deliver maximum picture quality to make movies and TV shows come to life. Available in two premium screen materials that provide crystal-clear, dramatic viewing in sizes from 92" to 130," with an inner layer of woven fiberglass that keeps the screen perfectly flat for years of wrinkle-free enjoyment.

### Whisper Quiet Motor

Lower and raise the screen without noise or distraction thanks to the product's top-of-the-line tubular motor. With whisper-quiet operation you can keep the screen out of the way when you're not using it, and set it up for front-row viewing in seconds.

### Easy Control Options

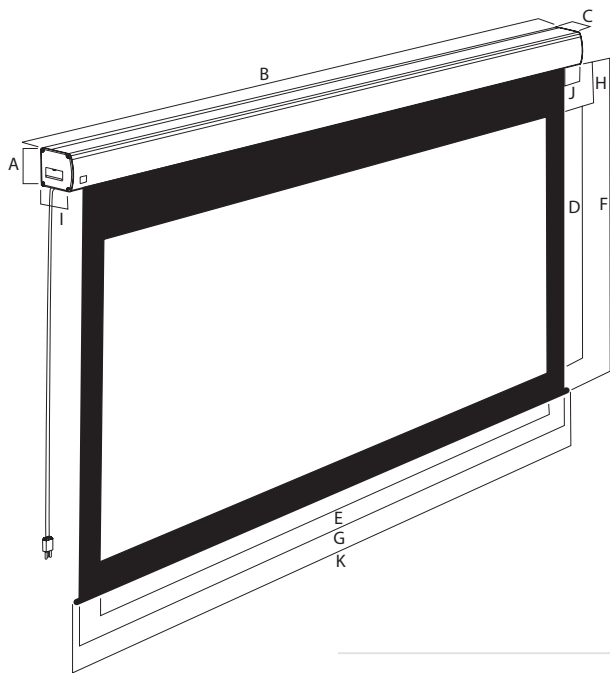

Operating your Dragonfly™ Projection Screen couldn't be easier – or smoother. Flexible control options allow you to hide it when it's not in use, then quickly lower it using a control system, switch on the wall, or a simple remote.

### 2-Year Limited Warranty

Dragonfly Motorized and Tab-Tension Motorized Projection Screens have a 2-Year Limited Warranty. This warranty includes parts and labor repairs on all components found to be defective in material or workmanship under normal conditions of use. This warranty shall not apply to products which have been abused, modified or disassembled. Products to be repaired under this warranty must be returned to SnapAV or a designated service center with prior notification and an assigned return authorization number (RA).

### HIGH CONTRAST

Contrast in an image is vitally important for rich color saturation and definition. High contrast screen material is the perfect solution for rooms with ambient light, or where the projector has weak black levels and high light output (many LCD/DLP projectors, for example).

### MATTE WHITE

Matte White screen material is the ideal solution when building a home theater with controlled lighting. With a 1.2 gain, hot spots and color shifting are eliminated, providing accurate imaging for a bright, clear picture. will not add nor detract from the image in any way and can be used for accurate imaging.
