PLATEMASTERS™

The World's Finest Wallplates

Like our cable assemblies, Comprehensive wall plates are the world's finest. We offer a large variety of wall plates for both professional and residential applications. Our standard plate offering allows you to quickly and easily choose the most common and popular plates and have them shipped right away. Never has ordering wallplates been so fast and easy. If your project requires a custom wall plate solution, we can design and manufacture almost any plate to your exact requirements.

Wallplate Finishes and Types

Comprehensive offers three different types of wallplates in many varieties:

ANODIZED
Our standard plates are anodized aluminum in either a clear or black finish. Anodized plates have a superior quality and finish. They are also available in a bronze or gold finish.

STAINLESS STEEL
Stainless Steel plates are available in standard brushed or painted Ivory or White.

KYDEX
Kydex plates are available in three finsihes: Black, Ivory or White.

Logos

Custom logos may be engraved into most plates for a nominal fee. Logos require a one time set up and processing fee. Please call your Comprehensive sales representative for more information.

Engraving

Connector engraving is standard. If you would like to remove or change any plate text, we can do so for an additional fee. Please contact us for more information.

Ordering is as Easy as 1 2 3!

Each plate configuration shown is Annodized clear as indicated with the suffix "**AC**"with either pass through or solder back connections, denoted by a "**P**" or an "**S**" in the 4th portion of the model number.

For example WP-1720-E-**P**-AC or WP-1720-E-**S**-AC.

To change the plate finish/color, simply change the suffix as shown below. All plates come with connector text engraving, but text can be removed for a nominal fee by replacing the "**E**" in the third portion of the model number with "**NE**" for no engraving. It's that easy!

MOST ORDERS SHIP IN AS LITTLE AS 48 HOURS

PlateMasters™

PlateMasters Custom Rack Panels

PlateMasters is your source for custom rack headers and panels. PlateMasters metal work is used in both commercial and residential installations world-wide. PlateMasters experienced staff can create your rack panels and rack headers to your exact specifications and our quick turn-around time will always keep your project on schedule. PlateMasters offers custom rack panels in the most popular format of black anodized aluminum and in all rack sizes. A large selection of connectors are available and we can accommodate almost every need. Your logo and text can also be custom engraved. Just call one of our sales specialists for a quote today!

PlateMasters Custom Rack Header Panels

PlateMasters offers custom rack header panels with your name and logo (or your customer's name and logo if you prefer). Our aluminum rack header panels come in a black anodized finish and are available in single-rack space size for all 19" racks.
Your logo and text can be laser engraved with white lettering. Custom rack header panels from PlateMasters make a great calling card to leave in the rack of equipment you just installed at your client.

PlateMasters Custom Rack Panels

Whether for commercial or residential installations, PlateMasters offers a wide variety of custom panels for almost every need. PlateMasters custom rack panels come in black anodized aluminum and can be custom engraved as needed. Simply specify the layout and connectors needed using our custom panel quote form and our experienced staff will design a custom rack panel to your exact specifications. All PlateMasters rack panels come with a flanged edge for better support and are available from a single-rack space up to six rack spaces high.
