ABOUT THE COMPANY

Established in the beautiful, technological hub of Brossard, Quebec, Standard Fire Safety International Inc. provides cutting-edge fire and safety products as well as solutions for our North, Central and South American customers. We are excited to provide high quality and cost-effective options, with the reliability of Canadian engineering.

Standard Fire Safety supplies you with a full range of robust fire alarm and safety devices with the best price and some of the best warranties in the market. We provide an array of fire and security products that include emergency light, batteries, access control systems, intercoms, document boxes and much more.

Our products include a variety of innovative technologies that makes them unique and more efficient. Get the service and support that you deserve. Our representatives and technicians are readily available to answer your questions.

Standard Fire Safety International Inc. is a provider of advanced and efficient security and fire protection technologies. Our products and technicians are required to meet industry standards that respond to the demands of the today's market and ensure the quality and performance of our products.

Our goal is to provide products and solutions that meet the safety and security challenges facing most people and businesses today. This includes providing innovative and efficient security solutions that ensure the safety and lives of our clients and the people they serve.

Providing an excellent service and support is as valuable to us, as the quality of the products we offer. You can be sure that we are always ready to answer your questions and give you the support you deserve whenever you need it.

ACCESS SYSTEMS - INTERCOM

IMA1000 - WIRED INTERCOM ACCESS SYSTEM

The IMA1000 is an intercom access system designed to work with gates, barriers and entrance doors. Calls are received on standard phone lines or mobile phones.

Your home or mobile phone number is added to the auto dial memory, just like adding a number to your own mobile. When a visitor presses the number of your property on the intercom, a call is made to your phone. When you answer the call you can speak to your visitor and let them in by pressing * to unlock the first door and pressing # to unlock the second door (if it supports two doors). Simple!

If you are out, the unit can divert the call to a mobile or your work phone so that you are still able to communicate with your visitor and let them in if you wish; it could be an important delivery.

IP NETWORK ACCESS | UP TO 1000 USERS | BRAILLE KEYPAD

KEY FEATURES

- Intercom for 1000 user numbers.
- Possibility of 5 numbers per user
- Remote programming via network cable
- No additional modules required.
- Indoor/outdoor installation with heating element included.
- 5-inch display.
- Integrated camera for security purposes (optiona).
- Image capture of incoming persons.
- Multilingual navigation menu.
- Keyboard with Braille and voice guidance.
- Postal key.
- Keyless entry with encrypted code.

ACCESS SYSTEMS - CONTROLLER KIT

AC2 - 2-DOOR CONTROLLER KIT

The AC2 is a powerful networked 2-door controller kit that supports up to 126 doors. It comes with one controller, two proximity readers, configuration software and a USB configuration cable. The controller has 8 supervised inputs, 8 programmable outputs and a unified database.

The controller is also compatible with a variety of available options including voice entry, wireless locksets, biometric technology, proximity devices and elevator restrictions.

The two proximity readers can be installed on an interior or exterior wall or cabinet, a window mullion, or on a metal door frame. Their unique design and construction ensures a great performance even under potentially adverse environmental conditions.

UP TO 126 DOORS | USB CONNEXION | 600MB DISK SPACE

KEY FEATURES

- 2 Card readers included
- System software configurator
- Includes USB cable for PC connexion
- 8 Programmable outputs
- 8 Supervised inputs
- Unified database
- 1 Gigabyte of internal memory
- 1.8 GHz CPU
- 600 Megabytes of Disk Space
- 1 USB Port

2 DOOR READERS/CONTROLLERS

ACCESS KEY-CHAINS (OPTIONAL)

ACCESS CARDS (OPTIONAL)

SAFETY EQUIPMENT

SD-DOC FIRE SAFETY BOX

A Fire Safety Box provides a central location for storing a copy of the building's fire safety plan, a list of contacts, checklists, manuals, and other important documents for emergencies.

In many cities across Canada, a Fire Safety Box is required by law and highly recommended by local fire departments. The fire safety plan can be locked using the lock supplied, which includes two keys.

MULTILINGUAL LABELS | 2 LOCK KEYS | INTERIOR INSTALLATION

KEY FEATURES

- Indoor Installation
- Lock with 2 keys
- Optional mounting frame
- Document Holder
- Multilingual Labels
- Flush Mounting

MULTILINGUAL STICKERS

DOCUMENT HOLDER

NURSE CALL SYSTEM

EMERGENCY PULL CORD STATION

Emergency Pull Cord Stations, also known as "Emergency Call Stations", are designed for easy use by healthcare professionals and patients alike. They are ideal for healthcare facilities such as hospices, nursing homes, hospitals, among others.

The stations are made from durable brushed stainless steel single gang plates. Each pull cord is 5.6 feet (1.7 m) long with a stainless pendant at the end. All stations use UL/ULC approved 125 VAC, 3A slide switches. It can be installed on standard single gang electrical boxes, not supplied with the units.

UL/ULC LISTED | FOOT CORD | CANADIAN TECHNOLOGY

KEY FEATURES

- The NMC100 Pull Cord Station has a red LED indicator.
- Size: 4.5" x 2.9"
- Weight: 0.2 LB
- A TPDT slide switch on the station provides dual alarm state operation.
- The emergency pull cord can be installed in combination with compatible fire alarm modules/panels to make it an addressable solution.

5.6 FEET PULL CORD

REAR SIDE CONNECTION

EMERGENCY LIGHTING

RUNNING MAN SIGNS

Emergency lights, such as Running Man Signs, play a critical role in ensuring safety and visibility during unexpected situations such as power outages, fires, or natural disasters. These specialized lighting systems are designed to provide illumination when standard lighting sources fail, helping guide individuals to safety and allowing emergency responders to navigate through darkened environments effectively. Typically equipped with battery backup systems or powered by alternative energy sources, emergency lights offer reliable illumination even in the absence of electricity, ensuring continuous functionality during critical moments. Their distinct flashing patterns and bright colors also serve as visual cues, alerting people to potential hazards and directing them towards evacuation routes or emergency exits, thus minimizing confusion and facilitating swift responses in high-stress scenarios.

ULC | FAST INSTALLATION | CANADIAN TECHNOLOGY

KEY FEATURES

- 1-Year Manufacturer's Warranty
- Fast installation with snap together design
- Injection molded themoplastic or metal
- Test switch under available in most models
- 3 green pictograms included
- ULC Compliance

EMERGENCY LIGHTING

OTHER EMERGENCY LIGHTS

Emergency lights are mandated by regulations in various industries and settings to comply with safety standards and ensure preparedness for unforeseen events. In buildings such as hospitals, schools, office complexes, and public venues, emergency lighting systems are strategically installed to meet specific requirements outlined by local building codes and fire safety regulations. Regular testing and maintenance of these lights are imperative to ensure their functionality and effectiveness during emergencies. Moreover, advancements in technology have led to the development of more energy-efficient and durable emergency lighting solutions, further enhancing their reliability and reducing operational costs while prioritizing safety and preparedness in both residential and commercial environments.

ULC | FAST INSTALLATION | CANADIAN TECHNOLOGY

KEY FEATURES

- 1-Year Manufacturer's Warranty
- Super bright LED lights
- Injection molded themoplastic
- Test switch under available in most models
- Remote capability available in some models
- ULC Compliance
