

SONOS

Amp Multi Rack Mount

RKMTAWW1BLK

SKU: 212276

The 2U design provides quarter-U spacing above and below each unit for airflow while saving 50% more rack space compared to traditional mounts. Requires only 24 screws for three amplifiers instead of the 52 needed with standard racks.

Designed specifically for Amp Multi, the 2U Rack Mount streamlines installations by reducing wasted space, maximizing airflow, and keeping cable management clean. The Rack Mount creates space above and below each unit to support airflow in a clean, 2U configuration. With its flat back design, Amp Multi slides easily onto the Rack Mount. Installation is satisfyingly simple. Amp Multi eliminates the need for vent panels between rack units and reduces the number of screws required for installation—saving time, rack space, and hardware.

- For use with the [Sonos Amp Multi](#)
- 2U
- 24 Screws for 3 Amps Compared to 50 in Standard Rack
- Built from a single piece of metal for durability, stability, and a refined look
- Maintains optimal airflow by eliminating the need for extra vent panels between units
