

VERTICAL PDU

Your Go-To Power Solution for Ultimate Reliability

Built for seamless integration making them ideal for pairing with UPS systems. Their compact form factor allows easy installation within limited rack space, providing efficient, organized power distribution without compromising valuable cabinet real estate. Choose the Vertical PDU to enhance power management across your setup.

This powerhouse solution ensures seamless, organized power distribution across a variety of applications—from IT and networking to labs and even residential setups. The Vertical PDU is crafted to meet the demands of modern infrastructure, providing consistent, reliable power that keeps your mission-critical equipment performing at its best.

Designed to fit effortlessly into or on the back of a rack, the Vertical PDU maximizes cabinet organization, creating a cleaner, more efficient setup. Built with durability at its core, this advanced PDU withstands even the most challenging environments, ensuring your equipment stays protected and operations run without a hitch.

Choose the Vertical PDU for unwavering performance, optimal space efficiency, and a smart, streamlined approach to power management for any configuration.

*Invest in reliability —
invest in a Vertical PDU*

FEATURES:

- Slim profile allowing for better airflow and easier access to equipment
- Provides more outlets making them suitable for high-density environments
- Perfect for lower-end applications
- Seamlessly integrates with other ESP/SurgeX products
