

Eluxa sets a new standard in life safety technology with its best-in-class portfolio of indoor LED notification appliances. Designed for performance and efficiency, Eluxa offers a wide range of low and high candela settings—featuring six selectable candela levels in a single device. Powered by advanced LED technology, Eluxa delivers the industry's lowest current draw across the full candela spectrum, maximizing energy efficiency without compromising reliability.

To support flexible and professional installations, the Eluxa Trim Plate series (ELTP-SG, ELTP-4S, ELTP-UNI) is UL and ULC listed for indoor use and enables seamless mounting of Eluxa appliances to recessed electrical back boxes. Whether you're working with single gang, double gang, octal, or 4" square configurations, these trim plates provide greater wall coverage and integration flexibility—making them ideal for retrofit applications.

Each trim plate is complete with hardware, sold in packs of 10, so no additional parts are required, saving time and reducing complexity on the job site. Their durable design adds stability to devices in challenging installations, while also concealing wall imperfections or misaligned electrical boxes, ensuring a clean, professional finish every time.

Available in Red or White to match Eluxa appliances, the trim plates offer both aesthetic consistency and installation versatility, making them the go-to solution for installers who demand reliability, efficiency, and visual appeal.
