

Quam SE12W

The SE12W is a powder coated, surface mount steel enclosure for the Quam C5/BU/CK2/S combination clock/speaker baffle assembly (sold separately). The SE12W is a slanted enclosure that is 4.75" deep at the top tapering down to 2.25" deep at the bottom. With it's appealing profile, heavy duty, all steel, white powder coated finish, the SE-12W is designed for years of service. Utilizing a pair of keyhole mounts on the back and Wiremold knockouts on the top and bottom, the SE12W facilitates a quick installation in new or existing facilities.
